

97th Birthday

On 29 August 1863, the first issue of The Journal came off the presses.

During the past 97 years, the "Spokesman of the Services" has never missed an issue.

We are proud to publish on Page 11 greetings from the top civilian and military leaders of the Armed Forces.

Favor MediCare For Retired List

Advice To Families, Page 18

EXTENSION of the Armed Forces Family Medical Care Program to Service Retired is advocated by the MediCare Executive Director.

Brig. Gen. Floyd L. Wergeland, MC, USA, points out that the choice of a retirement home by military men often is based upon the availability of military medical facilities.

Extension of the MediCare program to those in the retired lists would provide them with a better choice of retirement locations and would tend to lessen the build-up of large retired communities around major military installations, General Wergeland says.

Cost of adding retired personnel to the MediCare rolls, General Wergeland says, would be moderate: "I think there should be a MediCare program for these persons."

Two Move Up

GENERAL George H. Decker, left, Army Vice CofS, will succeed General Lyman L. Lemnitzer, when the CofS moves to the number one assignment in the Armed Forces as JCS Chairman. President Eisenhower has nominated General Nathan F. Twining for four-star rank on the retired list.

O'Sea STRAC Tests Wait Pentagon O.K.

FT. BRAGG, N. C.

SENIOR STRAC Commanders here for the massive Bright Star/Pine Cone III operation are awaiting final Defense Department go-ahead to schedule similar maneuvers next year in Europe and the Pacific.

Headed by Lt. Gen. T. J. H. Trapnell, USA, XVIII Airborne Corps Commander, senior STRAC officials feel that such overseas airlifts and maneuvers are a necessity if joint Army-Air Force combat readiness is to be proven under the most realistic conditions.

The overseas maneuvers, like the pres-

Liquor OK On Naval Ships—If Sealed

IT is now legal for Navy personnel to transport liquor aboard ships and aircraft.

In a change to Article 1269 of Naval Regulations, the Navy said that the transportation of liquor will be subject to the discretion of the ship's captain or the aircraft commanding officer.

The liquor must be "sealed in packages, securely packaged, properly marked and in compliance with the customs, laws and regulations, and stored in securely locked compartments."

Possession or use of alcoholic liquors for beverage purposes aboard ships or aircraft is still prohibited.

Admiral Parker Goes To Joint Target Task

MAKING what he described as "the most important decision I have participated in since I have been in the Pentagon," Secretary of Defense Gates has created an all-Service Strategic Target Planning Center at Offutt AFB, Nebr., headquarters of the Strategic Air Command.

Adm. Parker

General Thomas S. Power, SAC, CinC, was designated Director of Strategic Target Planning, and RAdm. Edward N. Parker, who has been Director of the Defense Atomic

Support Agency at the Pentagon, was

A Memorable Month

AUGUST has been a memorable month for the Armed Forces, highlighted by dramatic achievements in the missile and space fields. A key participant in the brilliant successes of the past month, as reported on Page 28, was the Air Force ARDC Ballistic Missile Division, under command of Maj. Gen. O. J. Ritland, above.

Senate Group Orders Independent Study Of Retired Pay; Stalls On Equalization

A SWEEPING, new study of military retired pay—to be made by an independent, non-government research organization—has been ordered by the Senate Armed Services Committee.

Senator John C. Stennis (D-Miss), Chairman of the subcommittee on military pay, touched off the action at a closed-door session of the full committee on Saturday, 20 August. He previously has contended that it may be necessary to institute a contributory retirement system for the Armed Forces and repeatedly has warned that if Congress is

forced to consider retirement equalization, a broad scale study "doubtless would result."

The research organization which will conduct the study has not yet been named, but the committee said it hoped the work can be completed "early in 1961" and the results turned over to the Stennis subcommittee for further consideration.

The study was ordered at the conclusion of a discussion by the Committee of HR 11318, the retirement equalization

Congress Will Restore President's 5-Star Army Rank—Without Pay

PRESIDENT Eisenhower's five-star rank as General of the Army will be restored by Congressional action next year.

The Chief Executive will not be authorized, however, to receive the active-duty military pay (\$20,543) which is authorized on a lifetime basis for all other five-star officers. Instead, like former Presidents Herbert Hoover and Harry Truman, he will be entitled to the \$25,000 retired pay provided for ex-Chief Executives.

President Eisenhower resigned his Army commission to campaign for the Presidency in 1952.

Chairman Carl Vinson (D-Ga) of the House Armed Services Committee has disclosed to THE JOURNAL that he will author legislation next January to restore the President's five-star rank—without pay—and to return his name to the rolls of the Army.

Chairman Vinson's sponsorship of the legislation will assure enactment early in the session. There is little possibility, however, that the Chief Executive's old Army title will be returned to him before he leaves the White House on 20 January, inasmuch as a new Congress seldom is sufficiently organized by that date to complete action on legislation.

Senate Group Sees Necessity For "Some" Negotiated Contracts; Asks 6 Changes

THE Senate Armed Services Committee has recommended that Defense Department procurement regulations be revised to require formal advertising "in all cases in which this method is practicable."

At the same time, the Committee said formal advertising is not always possible, and "some contracts must be negotiated."

Six changes in the procurement regulations are recommended by the Senate Committee which said, "Most, if not all, of the procurement problems in the De-

partment of Defense can be solved administratively."

The Committee's views are contained in a "Report on Procurement" which will be utilized by the Joint Committee on Internal Revenue Taxation in a further study of the Renegotiation Act.

In making its findings known, the Armed Services Committee said:

• All of the major contract types now in use have appropriate uses if applied in the circumstances in which their use is intended and if skillfully negotiated

Col. Summers Named Infantry Board Exec

Col. William M. Summers is the new Executive Officer of the Army Infantry Board at Ft. Benning, Ga.

He succeeds Col. Thomas R. Clarkin, Board President. The Executive Officer's post was formerly known as that of Deputy President.

Colonel Summers, the son of Brig. Gen. Owen Summers, USA-Ret., previously had been Chief of the Advance Planning Group, Headquarters U. S. European Command. He established the group in the U. S. Embassy

at Bonn, Germany, to develop plans for military training and military assistance to the proposed German Armed Force contribution to NATO. In December, 1955, the Advance Planning Group was redesignated MAA, Germany, with Colonel Summers as CofS.

Before coming to Ft. Benning in July, Colonel Summers was assigned to the Research and Development Office, Department of the Army, Washington, D. C., as Chief of the International Division.

U. S. ARMY ORDERS

Wilbur M. Brucker—Secretary of the Army
Hugh M. Milton, II—Under Secretary of the Army

one, would undoubtedly include a large amount of Air Force Reserve and Air National Guard airlift. They most probably would include greater participation by regular Tactical Air Command and Military Air Transport Service units.

The present operation, designed to simulate limited war situations such as occurred in Korea, included more than 2,000 STRAC personnel, 25,000 Air National Guardsmen and Air Reservists, and additional thousands of active duty personnel from the Continental Air Command, Tactical Air Command, and Military Air Transport Service.

More than 90% of the airlift, which covered over 700 aircraft, was provided by the Air Reserve and Air National Guard. Included in the airlift were the 101st Airborne Division to nearby staging bases and a tactical airdrop of 14,000 101st and 82d Airborne personnel and more than 100,000 tons of equipment.

Designed as a Combat Maneuver for STRAC, the two-week exercise from 13 to 27 August is a major test of Air Reserve and ANG airlift and support of combat units. These units were completely manned, serviced and maintained by Reserve Forces personnel.

Unlike the recent Army-Air Force exercise Big Slam/Puerto Pine, in Puerto Rico, Army units were airlifted here with full equipment and supplies. This airlift, however, covered a much shorter distance than the Puerto Pine operation.

At a special Bright Star press conference here 20 August, strong support for airlift modernization was volunteered by Lt. Gen. Herbert B. Powell, Third Army Commander, General Trapnell and other STRAC leaders.

General Trapnell, in answer to press queries, stated that the problems of both modernization of Army equipment and improved airlift are parallel. "Both," he said, "should be speeded up."

"I think we agree with the Air Force," General Trapnell said, "we'd like to have longer range and lift capability."

General Powell said that the Army would press for the Lockheed C-130 Hercules as a replacement for the present Fairchild C-119 Flying Boxcar for Army tactical airlift.

Major Army units participating in the exercise and their commanders are: Hq. XVIII Airborne Corps, Ft. Bragg, Lt.

STRAC And TAC

Lt. Gen. Thomas J. H. Trapnell (left), new Commander of STRAC, the XVIII Airborne Corps and Ft. Bragg, N. C., inspects a model of the C-123 "Provider" during an official call on Brig. Gen. Clyde Box, commander, 464th Troop Carrier Wing, at Pope AFB, N. C. A former All-American football player at West Point, General Trapnell, 58, came to Ft. Bragg after serving as Deputy CinC of the U. S. Army in the Pacific. Support of the Army's airborne forces is principal mission of the 464th, a unit of TAC's Ninth Air Force.

Gen. T. J. H. Trapnell; XVIII Airborne Corps Arty, Brig. Gen. George Speidel, jr.; 82d Airborne Division, Ft. Bragg, Maj. Gen. Dwight E. Beach; 101st Airborne Division, Ft. Campbell, Ky., Maj. Gen. Ben Harrell; 1st Logistical Command, Brig. Gen. Kenneth A. McCrimmon and 4th Med Tank Battalion, 64th Armor, Lt. Col. George Eckert.

General Powell is the Army Exercise Director, Maj. Gen. Maurice A. Preston, 19th Air Force Commander, is Air Force Director.

Tactical air forces are under command of Brig. Gen. Donald J. Strait of the New Jersey Air National Guard, and Brig. Gen. Rollin B. Moore, jr., Commander of the 349th TCW (AFRes) commands all troop carrier elements.

Study Of Government Jobs For Retired Service Officers Slated By House Group

A House Post Office and Civil Service Subcommittee has voted to conduct a detailed examination and study of the employment of retired military officers by the Government.

Chairman James C. Davis (D-Ga.) of the Subcommittee on Manpower Utilization said the group will examine the problem involved in "the hiring of retired military personnel to fill positions traditionally held by civilians."

Employment of retired officers by government agencies currently is restricted by the dual employment, dual compensation laws. Numerous attempts have been made to eliminate or modify the restrictions over the past several years, but with little success.

Earlier this year, the Hebert House Armed Services Subcommittee made an effort to amend the dual employment statutes but Chairman Tom Murray (D-Tenn.) of the Post Office and Civil Service Committee asked that the action be abandoned. He said his own committee has had the subject under intensive study and that he believed "good progress" had been made "toward an equitable and responsible solution which will fully serve the needs of the government, while at the same time preserving those limitations on dual employment and dual compensation which are necessary, now and in the foreseeable future, to protect the public interests and to prevent any abuse of administrative discretion."

House Armed Services Chairman Carl Vinson (D-Ga.) agreed to drop the section but told the Post Office Committee chairman that he did so only with the understanding that Chairman Murray would take action.

The announcement of the Post Office Subcommittee study was made 23 August. A spokesman said the study will be conducted during the remaining months of the year, presumably with the intention of making a report and introducing legislation early in the next Congress.

There is little hope, however, that the subcommittee will favor removal of the current restrictions inasmuch as Chairman Murray already has said that preliminary investigations "have brought to light several persuasive instances demonstrating the desirability of continuance of reasonable and well defined legislative controls in this area."

Col. Carns At Chanute

Col. Carroll H. Carns has assumed duties as Director of Personnel at Chanute AFB, Ill., Technical Training Center. He arrived from the Pentagon where he was Chief, Personnel Security Group, and Chairman of the Military Personnel Security Committee for five years.

He resides on base with his wife Sue, and their four children Kay 17, Carmen 16, William 10, and Michael 5. Kay will be attending the University of North Dakota this year.

USAF Board To Reduce Rated Officers Meets 10 Oct.; Groundings Start 31 Dec.

ON 10 October the Air Force's Central Flight Status Selection Board will meet to help trim its rated personnel down to Congressional and DoD-imposed ceilings.

Congress has ordered that the number of flying personnel in all Services be reduced to 99,046 by the end of the calendar year.

The Defense Department has not yet apportioned the rated ceiling among the Services, with the result that the Air Force and other Services are not sure just how far they will have to trim their ranks.

There are about 72,000 rated personnel in the Air Force, 3,799 of whom must be reported by major commands to the CFSSB for screening. The commands are also required to report all other flying officers whose qualifications in their rated billet are deemed marginal.

Groundings ordered by the Central Board, which is scheduled to end its deliberations 21 October, will be effective 31 December. Air Force officials said they hoped to give those grounded 60 days notice.

"It is emphasized," the Air Force said, "that, although a rated officer ceiling has now been imposed, the evaluations rendered by the Central Flight Status Selection Board will continue to be predicated essentially on qualitative considerations even though the quantitative factor remains present because of that ceiling."

"Therefore," AF Headquarters said, "the qualitative aspects of the Central Flight Status Selection System must be exercised to an optimum degree to insure the elimination of non-contributing members of the rated officer structure in order to reduce to an absolute minimum actions required to effect arbitrary quantitative reductions, particularly those actions which would otherwise threaten the economic welfare or service careers of the Air Force's more effective rated officers."

Flight Status Selection Boards in the major commands have been authorized to exempt officers from screening by the central board and recommend their continuation on flying status provided they have performed continuous aircrew duty since 1 April 1960 and their commanders desire them to continue in those duties.

Major commanders have been urged to screen the records of all their rated officers "to identify all who are considered to possess substandard qualifications and potential for assignment to positions requiring current rated knowledge and experience." Particular attention, Headquarters said, should be directed toward rated officers:

- who have sufficient years of rated service to be eligible for an advanced

aeronautical rating but do not possess the additional prerequisites for such ratings;

- who have already acquired advanced aeronautical ratings but who have not exhibited interest in the maintenance of professional qualifications compatible with their grades and years of rated service;

- whose performance or potential as officers is considered marginal; and

- who in recent years have amassed a relatively large amount of non-constructive flying time for the purpose of escaping identification under past and current Central Flight Status Selection Board screening criteria.

The number of officers who arbitrarily must be trimmed from the rated rolls to bring the Air Force within the Congressional rated limit, Air Force officials said, will depend only in part on the number of groundings ordered by the Central Board.

Other factors which will have a major influence in this area are the number of 20-year rated officers selected to receive flying pay without actually flying and the attrition of junior rated officers as they complete their tours.

Back To Classes

TWO First Classmen at the U. S. Air Force Academy symbolize the return to classrooms at the four Service Academies. Cadet Rich Mayo of Eureka, Calif., left, Falcon football quarterback and All-American candidate, with Thomas E. Schutt of Frankenmuth, Mich.

Marines Get SWAG Dates

The following Marine Corps officers have been extended on active duty to the final dates indicated:

CAPTAIN

Ernest U. Meler, 30 Jun 65; Donald L. Moore, 30 Jun 63; Paul L. Moreau, 30 Jun 64; Donald Quagliotti, 30 Jun 63; Delbert G. Ranney, 30 Jun 65; Robert F. Rick, 30 Jun 62; Raymond H. Russell, 30 Jun 64; Peter C. Scaglione, 30 Jun 65; Norbert F. Schnippel, Jr., 30 Sep 62; Charles Solomon, 30 Jun 64; Henry W. Steadman, 30 Jun 64; Darl R. Bloom, 30 Jun 65; Billy D. Bridges, 30 Jun 62; Harvey E. Britt, 30 Jun 64; William H. Browning, Jr., 30 Jun 65; Victor M. Chartrand, 30 Jun 65; Ludovico L. De Carlo, 30 Jun 62; Joseph R. Dobratz, Jr., 30 Jun 63; Thomas L. Eggleston, 30 Jun 65; Carl C. Foster, 30 Jun 64; Paul S. Frappollo, 30 June 64; Marion R. Green, 30 June 64; Ernest L. Ittner, Jr., 30 Jun 62; Americo L. Ambrosi, Jr., 30 Jun 64; James "M" Earle, 30 Jun 65; Francis M. Nelson, 30 Jun 64; Joseph A. Shearman, Jr., 30 Jun 63; Richard E. Skinner, 30 Jun 64.

FIRST LIEUTENANT

Glen Golden, 30 Jun 62; William E. Pope, 31 Jul 62; William H. Allen, Jr., 31 Dec 63; Don A. Brigham, 30 Nov 62; Donald P. Colby, 31 Aug 61; Robert M. Cramer, 30 Apr 63; Richard L. Gabel, 30 Sep 62; Lawrence R. Moyer, 30 Nov 63; Larry W. Robinson, 30 Sep 63; John V. Walsh, 30 Jun 63.

CBR REPORT

Next week's issue of The Journal will be highlighted by an on-the-scene report from the Chemical, Biological, and Radiological Warfare School which the Army maintains for all the Armed Forces on the Great Salt Lake, 90 miles southwest of Salt Lake City, Utah.

biological, radiological and electronic warfare.

In May, 1961, Logex 61, a logistical exercise, will be conducted at Fort Lee, Virginia, although it will not be a STRAC exercise. A number of personnel from STRAC units will participate. Logex 61 will include an estimated 6,000 participants. Among these will be students from technical and administrative service schools. In addition, selected reserve officers, recalled to active duty, and representatives of selected support units will receive training in continuous logistical support under assumed combat conditions against an enemy capable of using nuclear weapons.

Far East Budget Men

Lt. Col. Kenneth K. Wignall has been named Chief, Finance and Accounting Division, Office of the Comptroller, U. S. Army Japan at Camp Zama near Tokyo, after service in Washington, D. C. with the Office of the Director of the Army budget.

He and his wife, Carmel, have two children Philip, 11, and Ellen, 15.

Lt. Col. Thomas L. Harrigan has been appointed Chief of the Programs and Budget Division of U. S. Army Japan's Supply Services.

He came to Japan from Oakland, Calif., where he served as Director of Operations at the Oakland Army Terminal.

Colonel Harrigan, his wife Mary and their four children, Mark, 14, David, 13, Anne, 3, and John 1, live in Sagami-hara, a family housing area near the foothills of Japan's famed Hakone mountain range.

HAWAII TO MEADE

Formerly Deputy Engineer U. S. Army, Hawaii, Lt. Col. Charles T. Mewshaw, has succeeded Lt. Col. Roger L. Young as Commander of the 19th Engineer Battalion at Ft. Meade, Md.

Colonel Young, commander of the STRAC unit for nine months, has departed Korea.

Colonel Mewshaw and his wife, Geraldine, are the parents of six children, Judith, 19; Mary, 13; Charles, 12; Deborah, 11; Michael, nine, and Mark, 8.

Col. Rowan Wadsworth CO

Col. E. M. Rowan, former Ft. Richardson, Alaska, Commander, has assumed command of Ft. Wadsworth, N. Y. He succeeds Lt. Col. Charles F. Hilty, Post Executive Officer, who has been acting Post Commander at Wadsworth since the late June reassignment to Washington, D. C., of Brig. Gen. R. A. Hewitt, former CG of Fort Wadsworth and the 52d Artillery Brigade (Air Defense).

With Colonel Rowan at Ft. Wadsworth are his wife, the former Eileen Boyle of Brooklyn, N. Y., and three of their four sons, David and Michael, both 17, and Thomas, 15. Their oldest son, Ed, 20, is a cadet in his second year at the U. S. Military Academy, where his father was graduated in 1932.

Col. Wallace G-4 At Ord

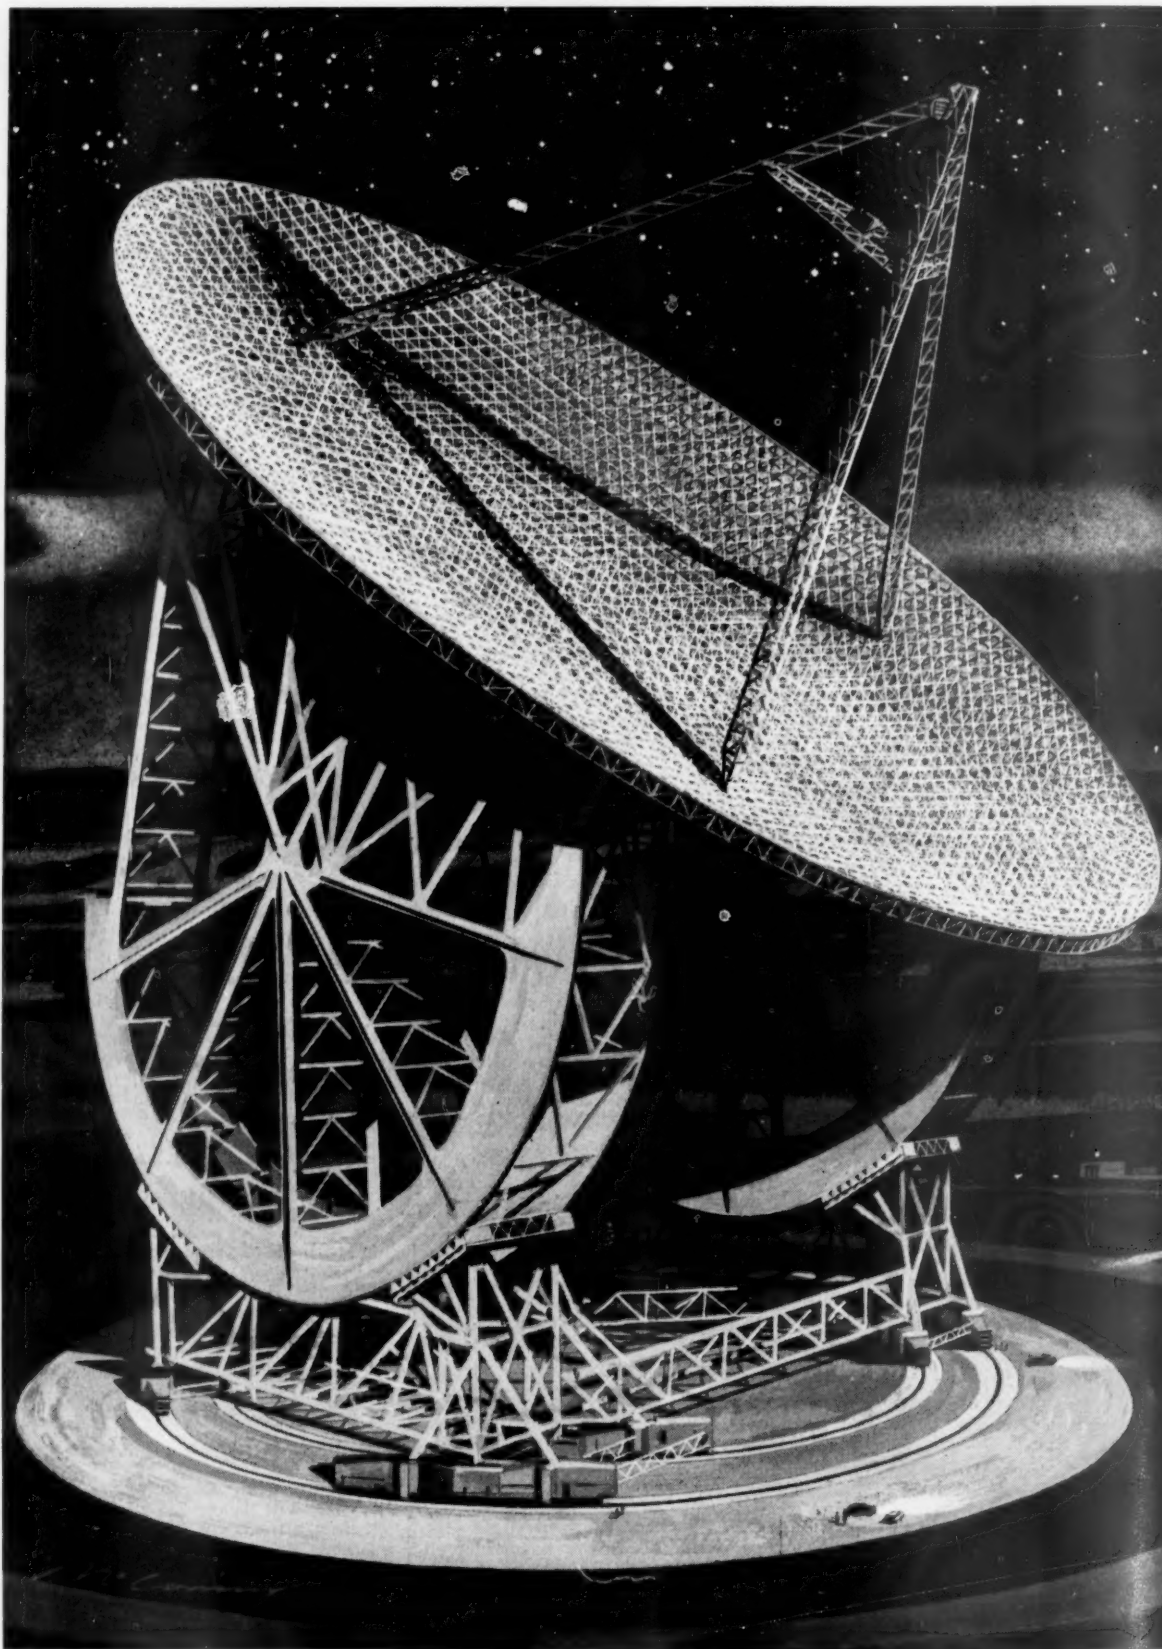

Col. Kenneth W. Wallace has been assigned as G-4 at Ft. Ord, Calif., reporting from the Army War College, Carlisle Barracks, Pa.

Son, Cadet Kenneth M. Wallace, is in his third year at West Point.

Colonel Wallace and his wife, Jeanne, and their three younger children, Tom, James and Carolynne, reside at 228 Andover Rd., Ft. Ord.

L/C Tyler To Germany

Lt. Col. Willoughby B. Tyler, Chairman of the Training Committee of the Army Infantry School's Special Subjects Department at Ft. Benning, Ga., will depart next month for assignment in Germany.

THE BIG "EAR"—The world's largest radio telescope is being built at the U.S. Naval Radio Research Station in Sugar Grove, West Virginia. It will tower to the height of a 60-story building. The movable reflector, directed by an

inertial-guidance system, is 600 feet in diameter and more than seven acres in area. The 10-foot thick reflector, with a potential range of billions of light years, will be built by the Columbus Division of North American Aviation.

Now
we will
listen to
stars
no telescope
can see

Strange sounds fill the heavens...sounds that can help us chart the universe for man's conquest of Space. To capture these sounds, the U.S. Navy is sponsoring one of the most imaginative projects man has ever conceived. It is a giant radio telescope that will listen to stars billions of miles away...beyond the reach of even the most powerful optical telescopes.

Though of gargantuan proportions, this cosmic listening device is a fine precision instrument. The "ear," a massive yet lightweight aluminum dish antenna, is being built by the

Columbus Division of North American Aviation—one of the most complete systems-creating centers in the world.

The Columbus Division, with its advanced research and development facilities, has developed new techniques for the construction of high-performance, low-cost antennas and complete radio telescope systems. These precision instruments will aid military and research organizations in detection, tracking, surveillance, and radio-astronomy...and contribute vitally to America's assault on Space.

THE COLUMBUS DIVISION OF NORTH AMERICAN AVIATION, INC.

Columbus, Ohio

Navy Mutual Aid Boosts Benefit \$2500

The Board of Directors of the Navy Mutual Aid Association has voted to pay a \$2,500 terminal dividend to the designated beneficiary of any member whose death occurs after 1200 EST on 12 August 1960.

This dividend is provided at no extra cost and is payable in addition to the regular benefit of \$7,500. The total death benefit is now \$10,000.

Paid-up memberships of less than \$7,500, terminated by death, will be increased by 33 1/3%. The dividend does not increase the loan or surrender values of memberships.

This action by the Board of Directors is the fifth increase in the terminal dividend since 1954. It was made with the

approval of competent actuarial authorities after a review of the Association's reserves and general financial condition.

All regular commissioned and warrant officers on active duty, including reserve officers on extended active duty, of the Navy, Marine Corps and Coast Guard are eligible for membership. Membership is permanent and change in status, such as resignation, retirement, or release to inactive duty, will not in any manner affect the membership.

Officers wishing additional information should contact a Nonresident Director or write directly to the Navy Mutual Aid Association, Navy Department, Washington 25, D. C.

LONG RANGE OBJECTIVES DIRECTOR

ADM. Thomas H. Moorer will become Director, Long Range Objectives Group, Office of the Chief of Naval Operations. He will relieve RADM. Horacio Rivero, Jr., whose new assignment has not been announced.

RADM. David J. McDonald, USN, will relieve Admiral Moorer as Commander Carrier Division SIX in November.

Capt. Charles F. Palmer has received orders as Commander, U. S. Naval Shipyard, Portsmouth, N. H. He will relieve Captain Henry P. Rumble.

Captain Palmer, presently commander of the Naval Shipyard, Long Beach, Calif., is a recent rear admiral selectee and will serve in that rank when he assumes his new position in February 1961.

Capt. Kenneth L. Veth has received orders as Commander Destroyer Flotilla SEVEN. Captain Veth, a recent rear admiral selectee, is presently Commanding Officer, Providence. He will assume his new position this month.

Robert E. Lee Commissioned

The first nuclear powered submarine to be launched in the South will be commissioned the USS Robert E. Lee 16 September at the Newport News, Va., Shipbuilding and Drydock Company.

The Robert E. Lee, fourth in the Navy's program for submarines designed to launch the 1200-mile Polaris missile, measures 380 feet from bow to stern and has displacements of 5,400 tons on the surface and 6,700 tons submerged.

Cdr. Reuben F. Woodall has been named Commanding Officer.

Maj. Payette Is Project Officer

Maj. James Payette has been named Special Projects Officer of the Marine Corps Recruit Training Regiment at the Parris Island, S. C., Depot.

Major Payette had served as Executive Officer of Marine Fighter Squadron 235, at MCAS.

Major Payette is married to the former Marie Elizabeth Stapleton of Galena Park, Tex. They have two children: Judith Ann, 14, and Richard James, 12.

B/G Fontana Joins JCS Joint Staff

Brig. Gen. Paul J. Fontana has joined the J-3 Operations Directorate, JCS Joint Staff, as Deputy Director for Operations.

General Fontana, promoted to his present rank last month, has been CofS, 1st Marine Brigade, in Hawaii.

A naval aviator, General Fontana has been a Marine officer since 1936. He earned both the Navy Cross and DFC while leading a Marine fighter squadron against the Japanese over Guadalcanal. He destroyed five enemy aircraft in aerial combat at Guadalcanal to become one of the first WWII "aces." Subsequently, during action in Korea with the 1st Marine Aircraft Wing, General Fontana earned the Silver Star Medal for close air support of the Army's 1st Corps, and the Legion of Merit with Combat "V" while leading Marine Aircraft Group 33.

NATO Naval Tests Set For Autumn

Two coordinated NATO training exercises will be held, the first beginning 20 September, in the Atlantic between Portugal and Madeira, the western Mediterranean and in the Gibraltar area involving Naval and Maritime air units from the Allied Command Atlantic and Allied Command Europe.

Exercise Ballast I and Coffey Dam are sponsored by Admiral Robert L. Dennison, USN, Supreme Allied Commander, Atlantic, and General Lauris Norstad, USAF, Supreme Allied Commander Europe.

Exercise Ballast I will be conducted 20 to 27 September by Vadm. M. F. Douguet, French Navy. He will serve as Commander-in-Chief, IBERLANT area, which is being activated for this training exercise.

Antisubmarine surface and air units will be engaged in protection of shipping and in operations against submarines attempting to reach the Strait of Gibraltar. Destroyer-type ships, submarines and patrol aircraft will be from navies and air forces of France, Portugal, the United Kingdom and the United States. Forces assigned to Exercise Coffey Dam, taking place from 24 September to 1 October, will be coordinated by Admiral Douguet, Admiral Sir A. N. C. Bingley, RN, Commander-in-Chief, Allied Forces, Mediterranean, and RAdm. P. F. Powlett, RN, Commander Gibraltar.

The purpose of Coffey Dam is to exercise NATO and national forces in the control of the Gibraltar Strait and its approaches. In both exercises submarines will oppose the surface and air forces. A total of about 24 naval units and 4 maritime patrol squadrons from the Allied Command Atlantic and from the Mediterranean Command area will be involved in the exercises.

RANGER RETURNS

The attack aircraft carrier Ranger (CVA-61) completing a seven month tour with the Seventh Fleet in the Western Pacific, returns to Alameda Naval Air Station, Calif., next week. Ranger is commanded by Capt. Donald Gay.

Embarked in Ranger is Carrier Air Group Nine, composed of Fighter Squadrons 91 and 92, Attack Squadrons 93, 94 and 95, Heavy Attack Squadron Six (VAH-6), and a detachment from Helicopter Squadron One. All of the squadrons, except VAH-6, are based on Northern California. VAH-6 is from Whidbey Island, Wash.

Traveling in company with Ranger, is Destroyer Division 52, home ported at San Diego. The Division is composed of the destroyers Brinkley, Bass, Duncan, Chandler and Henderson.

Hemann, John W, USS SEA LEOPARD; to SUBLANT.
Mathias, Jack M, AIRTRANSRON 3; to FLETACSUPRON 24 NAPLES DET.
McEneaney, John E, ANTARCTICSUPACTY; to NAVPHIBASE LITTLE CREEK NORVA.
McQuaid, Elizabeth A, NAVSTA NAVBASE NPT; to NAVHOSP NAVBASE NPT.
Means, James M, CLARKSVILLE BASE CLARKSVILLE; to FLDOOM DASA ALBUQUERQUE.

PROTECTION—GIVES YOU PEACE OF MIND

For 81 years—since 1879 the Navy Mutual Aid Association has been providing insurance protection and aid to dependents of deceased officers.

Five different plans of permanent insurance protection (\$7,500 plus \$2,500 terminal dividend) is provided as near to the actual net cost as possible. More than 29,000 of your fellow officers are now sharing in these substantial savings in life insurance and other advantages and benefits so necessary to your family in time of need or death.

Available to all active duty officers not over 62 years of age of the Navy, Marine Corps and Coast Guard including Reserve Officers on extended active duty.

Benefits in Force \$200,000,000
Assets \$45,000,000

A VITAL FACTOR IN BUILDING THE MORALE
OF OUR OFFICER PERSONNEL

NAVY DEPARTMENT—WASHINGTON 25, D. C.

M/G Hopwood Heads AF Chanute Center

Maj. Gen. Lloyd P. Hopwood is the new Chanute AFB, Ill. Technical Training Center 24 Commander after serving two years in the Pentagon as USAF Director of Personnel Procurement and Training.

Mrs. Hopwood is the former Miss Kathleen McGowan of York, Nebraska. They have one son, John, 18, who will be attending Baylor University in Texas this fall.

AUTOMATIC SECURITY SERVICES

Approved security systems such as those provided by ADT are becoming more and more important in the nation's security program.

It is significant that ADT safeguards properties for 30 Government agencies at hundreds of locations throughout the world.

ADT, always a leader in automatic protection of commercial and industrial properties, has also taken its natural place as a leader in the field of security signaling.

For information on all types of security systems, phone the ADT office listed in your directory or write our executive office in New York.

A NATIONWIDE ORGANIZATION

155 Sixth Avenue
New York 13, N. Y.

COL. GOULD SUCCEEDS B/G AT SAC

COL. Gordon T. Gould, jr., has been named Chief of the Communications-Electronics Divisions in SAC's Directorate of Operations at Offutt AFB, Nebr.

He succeeds Brig. Gen. John A. McDavid, assigned to USAF Headquarters as Deputy Director of Communications-Electronics for the JCS.

Colonel Gould, USMA '41, had been Director of Control Systems at ARDC Headquarters, Andrews AFB, Md.

Colonel Gould attended the Massachusetts Institute of Technology from 1948 to 1950, where he was awarded a masters degree in electronics engineering.

M/G Bogart Of AMC Will Receive Top Management Award At AFA Meeting

Maj. Gen. Frank A. Bogart, AMC's Director of Supply, will receive the Air Force Association's top management award 23 September at the annual convention in San Francisco.

Two other AMC officers at the command headquarters, in addition to one at San Antonio, Tex., and a civilian at Oklahoma City, Okla., also will receive awards for outstanding contributions to management. All four of these awards were granted on the basis of work done at AMC's field installations.

General Bogart will receive the Distinguished Management Award. Other winners include Col. Louis H. Garrett, the Procurement and Production Management Award, and Col. Loran J. Anderson, the General Management Award. Both are at AMC Headquarters, Wright-Patterson AFB, Ohio.

The Maintenance Engineering Management Award will be presented to Col. Glover P. Grubaugh of San Antonio Air Materiel Area, Kelly AFB, Tex., and the Supply Management Award to Joseph E. Mileur, jr., of Oklahoma City Air Materiel Area, Tinker AFB.

General Bogart will be honored for exemplary "managerial ability while serving as AMC's Director of Plans and Programs and Director of Supply. He is credited with establishing an enviable record for his practical approach in management of the AMC Operating Program, insuring that budget appropriations for unmanned weapons did not affect unduly the support of manned weapons, establishing a reliable worldwide inventory of Air Force assets known

as fence-to-fence, and strengthening AMC relationships with industry."

Colonel Garrett will receive his award for his activities as Director of Procurement and Production at Middletown Air Materiel Area in Pennsylvania. In this position, he had staff supervision over 42% of all Air Force contract awards. He is now chief of Contract Management Division at AMC Headquarters.

Colonel Anderson's award is for his activities as Commander, Topeka AF Depot, Kansas. He began and carried out a large part of the phasing out of the depot while continuing support of the Air Force on a global basis. He came to AMC Headquarters, in February as Deputy Director of Personnel and Support Operations. His chief responsibility at the headquarters was to accelerate AMC actions on installation and checkout of guided missile operational sites. He is now AMC's Deputy Chief of Staff for the Missile Site Activation Program.

Colonel Grubaugh's award is for his work as Director of Maintenance Engineering, San Antonio Air Materiel Area. He reduced the time for depot maintenance of first-line bomber aircraft by 35%, permitting SAC to have fuller use of the aircraft.

Mr. Mileur will receive his award for his work as Deputy Chief, Plans and Management Office, Directorate of Logistic Support Management at Oklahoma City Air Materiel Area. He is credited with reducing costs by millions of dollars through a policy of procuring items required for repair of aircraft in kit form rather than by individual items.

460th F-I Squadron Is Hughes Trophy Candidate

The 460th Fighter Interceptor Squadron has been selected as the Air Defense Command's representative for the Hughes Trophy Award.

Commanded by Lt. Col. William M. Reynolds, jr., the Portland, Oreg., F-102 squadron was selected for outstanding ratings received in ADC combat readiness inspections and flying safety records during the year 1, July 1959 through 30 June, 1960.

As the ADC representative, the unit's criteria and background information was sent to USAF Headquarters where it will compete with other fighter squadrons for the award.

The Hughes Trophy Award was established by Hughes Aircraft Company and the Air Defense Command in 1952 to be presented to the fighter squadron for "outstanding achievement in the Air Defense mission."

It was later decided by Hughes Aircraft and Air Defense Command that all interceptor squadrons worldwide would be eligible.

B/G Bromiley At Travis

Brig. Gen. Richard F. Bromiley has assumed duties as Deputy Commander and CofS at the Western Transport Air Force, Travis AFB, Calif. He fills a position, vacant since June when Brig. Gen. E. Wade Hampton assumed command of the 1501st Air Transport Wing at Travis.

General Bromiley, 44, was formerly MATS Deputy CofS for Plans at MATS Headquarters Scott AFB, Ill.

General Bromiley, USMA '38, was promoted to brigadier general in February. He and his wife have three children.

Col. Price At Lackland

Col. James H. Price has been named Commander of the 3700th ABG at Lackland AFB, Tex. He succeeds Col. Wilson H. Banks reassigned to Williams AFB, Arizona.

Colonel Price had been Ninth Air Force CofS.

Colonel Price is married to the former Marie Barrett of Arlington, Tex. They have a son James, Jr.

SAC Accepts First Operational B-58

General Thomas S. Power, SAC Commander in Chief, has accepted the first operational Convair B-58 Hustler from Air Research and Development Command representatives, following technical evaluation tests.

Twelve of the Mach 2 bombers have been turned over to the 43d Bomb Wing at Carswell AFB, Tex., making it the first unit to be equipped with the B-58.

Second unit to receive the B-58s will be the 305th Bomb Wing at Bunker Hill AFB, Ind., after the 43d Wing reaches full strength.

Future SAC B-58 crews will be trained at Carswell.

General Power said the B-58 will replace a part of the command's B-47 Stratojet force.

Col. Maersch Directs Electronics At Shaw

Col. John M. Maersch has been named Director of Communications and Electronics, Office of the Deputy for Operations, at Ninth Air Force headquarters, Shaw AFB, S. C.

Colonel Maersch formerly was on duty at Naples, Italy, as Chief of Telecommunications Plans, Communications Division, Allied Air Forces Southern Europe.

Colonel Maersch is married to the former Lorraine Pool of Kohler, Wisc. They have one son, John Charles, age 11.

\$500 AWARD

Lt. Col. Abner M. Aust, jr., Chief, Operational Test and Evaluation Division, TAC Headquarters, Langley AFB, Va., has won first place award of \$500 for his adopted suggestion in the TAC Military Suggestion Program.

He devised a mechanical replacement part for jet aircraft that will increase power thrust during in-flight refueling operations.

Combat Crew Training Group Graduates 22

Twenty-two Air Force officers were graduated from the 4411th Combat Crew Training Gp., at Shaw AFB, S. C. recently. Graduating from the Advance Flying Training School they will take their places in the Air Force's worldwide tactical reconnaissance units.

The 4414th Combat Crew Training Sq., commanded by Maj. William D. Brittain, handled the RF-101 Advanced Flying Training School and the 4415th Combat Crew Training Sq., commanded by Maj. Howard E. Nichols, trained the RB-66 crews.

Graduates of the RF-101 school were: Capt. F. M. Cook, H. W. Maher and D. M. Moats. Also 1st Lts. W. J. Brooks, S. M. Guaym, J. W. Linnihan, S. B. Mathews, J. S. Menees and K. R. Nimmo.

RB-66 graduates were: Pilots—Maj. B. F. Fox, Capt. E. H. Burgess, W. S. Dawe, F. J. D'Entremont, D. N. Thompson Jr., V. P. Tsufis, J. F. Unagst and J. J. Woodyard. Navigators: 1st Lts. C. D. Devoney and T. E. Rowney and 2d Lts V. H. Chase, G. W. Gebhardt and G. K. Terhune.

B/G Bond To Italy

Brig. Gen. Charles R. Bond, Commander of the San Francisco Air Defense Sector at Hamilton AFB, Calif., will become Deputy Commander of the 5th Allied Tactical Air Force in Italy.

He will be succeeded by Brig. Gen. Thomas K. McGeehee, Commander of the Grand Forks, N. D., Air Defense Sector, who reports to Hamilton in September.

As a member of the "Flying Tigers" under General Claire Chennault, General Bond was credited with nine Japanese aircraft. He was shot down twice in combat.

Capt. Wood Is AMC's Top Story Writer

Capt. William V. Wood of Ogden Air Materiel Area in Utah has won first place and \$150 in Air Materiel Command's 1960 Short Story contest.

Other winners were Lt. Col. Theodore H. Gorton, chief, Plans and Programs Office at W-PAFB, \$100, and 1st Lt. Howard N. Nemerovski, 573 Daytona Parkway, Dayton, of the AMC Staff Judge Advocate's Office, \$75.

Three Good Reasons why you should be insured with USAA

We could name many more, but even these three are reasons enough why you should be insured with USAA.

SAVINGS of 38.8% off standard rates are currently provided stateside USAA automobile policyholders. No other insurance company offers the same broad coverage at so low a cost. Such savings are possible because USAA is a non-profit association—policyholders are a preferred risk group*—and no salesmen are employed or commissions paid to secure business.

SOUND MANAGEMENT Since its founding 37 years ago, USAA has been managed and directed by active and retired officers of the U.S. Armed Forces. There are more than half-a-million USAA policies in force and assets at year end 1958 totaled over \$58 million. Liberal dividends have consistently been paid to USAA policyholders with more than \$64 million returned since 1922.

GEOGRAPHICAL SERVICE USAA policies are in effect over a wide geographic area†. Claims are settled promptly even in the most remote places. Wherever USAA operates there are authorized attorneys and claims adjusters conveniently located to serve you and to expedite a settlement.

Take advantage of the greater savings, protection and reliability offered by USAA. In addition to automobile insurance, USAA also makes available policies covering COMPREHENSIVE PERSONAL LIABILITY and a WORLD-WIDE HOUSEHOLD GOODS AND PERSONAL EFFECTS FLOATER.

Mail the coupon below to secure rates on your automobile, or for information on these other policies.

*Membership in United Services Automobile Association is limited to active and retired Regular officers, midshipmen, cadets and warrant officers of the United States Army, Air Force, Navy, Marine Corps, Coast Guard, Public Health Service, Coast and Geodetic Survey; Foreign Service Officers of the Department of State; Reserve and National Guard officers when ordered to extended active Federal duty for a period of six months or longer; the widows of such officers and warrant officers so long as their status is not changed by remarriage. Reserve and National Guard officers who have established membership in USAA while on active duty and who are later released to inactive or retired status, may continue their insurance or renew their insurance at any time so long as they retain their commissions or warrants. †USAA operates in the United States, its possessions and territories; Canada, Cuba and the Canal Zone; Japan, the Philippines, and certain U.S. bases in the Pacific; as well as in Western Continental Europe when the policyholder is on active duty.

Promotion Action Disclosure Is Essential

Secretary of Defense Gates need not wait for weeks until the work of the Bolté Committee on revision of the Officer Personnel Act of 1947 is completed before he can take what we believe would be an important action to strengthen officer morale and eliminate personnel policy disparities among the Services.

Specifically, we propose to the Secretary that he insist forthwith on full disclosure by all of the Services of as much information as possible concerning all selection and promotion actions.

In terms of numbers, a small incident has triggered our speaking out on this sensitive subject at this time. Let it be quickly stated, however, that when it comes to safeguarding the integrity of Service promotion procedures, the issue must not be reckoned in mere numbers. That is why, for example, THE JOURNAL has supported the persistent efforts during the past 10 years of a single Navy retired commander to win a review of what we believe was an unfair promotion procedure.

More current is our concern with the failure of the Army to make known, as was revealed in last week's issue of THE JOURNAL, that there have been some unannounced additions in the "outstanding" category on the 1959 list of selections to lieutenant colonel. The Army's answers to a series of JOURNAL inquiries last week were hardly definitive.

Beyond this single incident involving a single Service, there are some fundamental differences in approach which Secretary Gates may well wish to examine. As the former Secretary of the Navy, he knows that it has been the Navy policy to make available to the press the instructions of the Secretary of flag selection boards. Also, the Navy and Marine Corps make it a practice to release the names of selection board members for all ranks.

Not so in the Army and Air Force. The policy of these two Services is to withhold the instructions to general officer boards and to keep the membership of all officer selection boards under wraps.

The Army and Air Force make the point that to reveal membership of selection boards would expose the members to "pressures." We dismiss this argument summarily. To accept it would be to question the integrity of the individuals on the board and to ignore the oath which they take in beginning their deliberations.

We hope, if nothing is done about this in the interim, that the committee which is reviewing the Officer Personnel Act, under General Charles L. Bolté, USA-Ret. will urge (1) a uniform policy among the Services as it pertains to release of information concerning promotion actions, and (2) that this uniform policy be built on maximum disclosure of pertinent details.

But as we said at the outset, Secretary Gates need not wait for the Bolté Committee Report. He can direct such action now.

Lt. Gen. Sam Williams Ends Brilliant Career

In far-off Saigon, a distinguished military career that began in Texas 44 years ago comes to a close 31 August for Lt. Gen. Samuel T. Williams. Twice kept on active duty beyond scheduled retirement, he has been Chief of MAAG Vietnam for five years. A normal two-year tour was extended by President Eisenhower at the request of President Diem of Vietnam.

General Williams, wounded three times in action during WWI, fought through the Normandy Landing and five campaigns in Europe during WWII. In Korea, he saw combat action as Commanding General of the 25th Infantry Division. He later returned to Korea as Deputy Eighth Army Commander.

General Williams was Fourth Army Commander in his native Texas when he was named in September 1955 to direct the job of helping the people of Vietnam protect themselves against the threat of Communist attack. Although certain aspects of our aid program to Vietnam have come under heavy criticism, the work of General Williams and his MAAG people not only has won great and unanimous acclaim on Capitol Hill

but has been pointed to as an example of the proper way to handle aid to our friends.

Accompanied by his wife, Jewel, General Williams will return to Texas to live in retirement after a career in which he has served his Nation with distinction on the battlefield and has played a key role in the effort to strengthen our Allies and thereby to help preserve freedom.

Getting Minuteman On The Rails

The Air Force, aided by the Army, and working in close harmony with Industry, has completed ahead of schedule a series of Minuteman mobility train tests. It had been thought that six test train deployments would be necessary to obtain data concerning a rail-mounted version of the Minuteman ICBM, but it has been possible to complete the test project with only four deployments.

General Thomas S. Power, CinC of the Strategic Air Command, said: "We have been especially pleased with the response of the railroads to this operation. They have clearly shown a willingness to make the missile mobility plan work."

General Power noted that SAC was joined in the tests by the Air Force Ballistic Missile Division; Air Materiel Command's Ogden Air Materiel Area at Hill AFB, Utah; Army Transportation Corps, which provided rolling stock for the train; Boeing Airplane Company, Minuteman Assembly and Test Contractor; and the Association of American Railroads, which coordinates train movement over civilian rail lines.

The attainment of operational Minuteman Mobility is being speeded by the closest possible cooperation between the Services and Industry. In short: the rails are being greased for quick action to strengthen National Defense.

Readers' Views

General Decker's Appointment

■ The appointment of General George H. Decker to be Chief of Staff, United States Army, is of course due recognition of his merits but it is also evidence of the equality of opportunity that exists in the Army. As an officer who entered the Army from a 1917 training camp I take this occasion to hail the fairness which I have experienced for a lifetime when serving under and with graduates of West Point. Their moral and intellectual standards have been my ideal in the service. In shifting situations their straightforward purpose was to be counted on. I never saw a West Pointer cheat in an examination. Long live the Long Gray Line! and may its motto of duty, honor and country lead us through the hard fights that face us not only all over the world but within our own borders.

JOHN HULING, JR.
COL. USA-RET.
ROUTE 1
ELKHORN, WISC.

Shot Gun Approach

■ Permit me to quote extracts from letters I sent to my two Senators and my District Congressman on the subject of HR 10959, the employment of retired officers in industry:

"... Suppose someone seriously, were to sponsor a law which would include the following:

"Whenever a member of Congress actually departs upon a trip for official Congressional purposes, he shall forfeit two years pay and allowances. Furthermore, if he completes said trip, he shall be fined X dollars.

"In the same light of HR 10959, such a law is essential because it is rumored that some Congressmen may have fudged on their travel expenses.

"This is the type of interpretations made by the general public. Many of the general public now think I am a habitual malefactor because of the furor over HR 10959. If you can in good conscience blanket all officers with the provisions of HR 10959; then you likewise should cover one or two misdeeds (if any) in travel expense accounts with a shot gun law rather than specifically pointing out the guilty.

"The laws of the land are adequate to prosecute the individual without needing to smear all officers with the implications of HR 10959 . . ."

"... In recent years the Congress, aided by the Department of Defense, has in effect made startling accusations

House Acts On Medical Care; General Wood Bucks Sub Plan To The Navy; Invalid Corps Wins Praise

10 Years Ago—The House Armed Services Committee took action this week to insist on medical care for dependents of military personnel . . . despite resistance by the Department of Defense Director of Medical Services.

50 Years Ago—An inventor has favored General Wood with his views of the subject of providing a submarine large enough and wicked enough to flap a huge wing over an unsuspecting battleship, drag it down to the bottom of the ocean and hold it there until its crew is drowned. General Wood has forwarded the plan to the Navy Department.

97 Years Ago—Seventy-five companies have thus far been organized and mustered into the Invalid Corps, and have been assigned to garrison and other duty not requiring too much fatigue or exposure. The corps is proving itself a valuable addition to the service, especially as it relieves healthy troops for more active service in the field.

Army Honor For A Navy Captain

Capt. William B. Hirst, jr., USN, has been awarded the Army Commendation Medal by Maj. Gen. William D. Hamlin, CG of the Army Signal Training Command at Ft. Monmouth, N. J.

Captain Hirst, a graduate of Stanford University, was commended for outstanding service at Monmouth as Naval Advisor on the staff of the CG, Deputy Director of Armed Services Electro-Standards Agency, Commanding Officer of the Navy Electro-Standards Agency, and senior Naval liaison officer of the U.S. Army Signal Research and Development Agency.

He reports shortly for new assignment in San Diego.

Fourth Army Info Chief To School

Col. Walter G. Hopkins, jr., for the past 14 months Fourth U. S. Army's Information Officer, has departed Ft. Sam Houston, Tex., for an 18 month course in managerial public relations at the University of Alabama.

A regular Army Artillery Officer, Colonel Hopkins entered service following graduation at the University of Oklahoma in 1939. He completed the Command and General Staff College course at Fort Leavenworth, Kans., in 1947 and was graduated from the Army War College in 1957.

All E-8 And E-9 Promotions 1 March

The Air Force has abandoned its "once-a-year selection, twice-a-year promotion" system for chief master sergeant (E-9) and senior master sergeant (E-8) and will henceforth make all promotions 1 March.

Chief reason for changing to a once-a-year promotion schedule, the Air Force said, is simplification of administration "through the elimination of the wealth of paperwork stemming from a man's reassignment following his selection for promotion."

Under the old system airmen were selected for E-8 and E-9 promotions in the late fall but chevron changes took place 1 December and 1 June.

Headquarters expects to be able to release quotas for E-8 and E-9 during the latter part of December. Selection boards will be convened by commands soon after that in order to have their nominations and selections completed before the 1 March 1961 promotion date.

Army Names Officers For '61 Armed Forces Staff College Course

THE Army this week announced the names of the following majors and lieutenant colonels chosen to attend the Armed Forces Staff College, Norfolk, from February to June 1961.

Also announced was the designation of Maj. Robert N. Starr to attend the U. K. Joint Services Staff College from October 1961 to April 1962.

In the following list, the officers are majors unless their names are preceded by an asterisk, indicating the rank of lieutenant colonel.

Sec'y Gates On Strategic Plans

(This is the text of the statement issued by Secretary of Defense Gates following the Commanders Conference at the Pentagon on 17 August).

"The advent of missile systems of various kinds has, of course, begun to change the composition of our strategic retaliatory force. Previously this force consisted entirely of manned bombers. Although we foresee a continuing requirement for manned bombers for as far into the future as we can now see, with the passage of time, an increasingly greater portion of the retaliatory force will be ballistic missiles—both land and sea based.

"In conjunction with the Joint Chiefs of Staff I have been working on plans to insure that we provide the most effective balance of the missile-bomber force and to insure that we can properly integrate the employment of these various forces if it ever becomes necessary to use them.

"We have improved our arrangements to accomplish these purposes. This does not involve any rearrangement of command. It does provide for centrally directed operational planning, under Joint Chiefs of Staff policy control and direction, to insure the integration and employment of the various forces.

"The detailed planning will be conducted at Strategic Air Command Headquarters at Omaha. General Thomas S. Power, USAF, is being designated Director of Strategic Target Planning and in this capacity will be the planning agent for the Joint Chiefs of Staff in developing and keeping up to date the detailed plans which are necessary. These duties are in addition to and separate from his duties as Commander in Chief of the Strategic Air Command. There will be a number of senior officers from all of the Services, together with representatives of the Joint Chiefs of Staff, assigned to the Director at Omaha. These officers will work as an integrated joint staff. In addition, there will be senior representatives from appropriate unified commanders who will participate in the development of the plans. A Deputy Director of General or Flag rank who will be from another Service will be assigned to General Power.

"This arrangement provides for centralized planning and decentralized and coordinated execution of plans by the various commanders concerned.

"The foregoing actions do not represent any change in the established national military policy, or in our relations with our allies."

Services And Industry Will Study Missile Transport Problems At Bliss

A JOINT industry-military seminar to discuss problems concerned with the domestic transportation of missiles, missile components and other items of oversize or hazardous nature entailing special transportation considerations will be held at Ft. Bliss, Tex., 20-23 September.

The seminar, conducted by the Military Traffic Management Agency, will bring together 300 industry and military leaders in the transportation field, along with representatives of government regulatory agencies.

The meeting was called because of the rapid expansion of missile traffic in the continental United States and its growing impact upon the nation's transportation systems. With representation from every segment of the commercial industry, it will provide a medium for the fullest possible interchange of knowledge and know-how on all aspects of the movement of missiles and associated ground support equipment.

All of the Military Departments will take an active part in the seminar,

which will feature unclassified presentations on the Army, Navy, Air Force, and Marine Corps missile systems.

Discussions will deal with transportation of those items of the missile and rocket systems, as well as the satellite programs of the Military Services, which require special handling by virtue of hazardous qualities, size, weight, sensitivity, or other unique features.

Also on the seminar agenda will be transportation-related discussions on warheads, liquid and solid propellants, safety and security in handling hazardous materials, shock and vibration factors.

Three separate panel discussions—a military panel, a carrier panel and a regulatory panel—will be participated in by transportation experts in each of those fields.

The joint seminar is sponsored by the Department of Defense through the Department of the Army and the Military Traffic Management Agency, commanded by Maj. Gen. I. Sewel Morris.

"HANDS OFF" F-105

A new report on 20,000 miles of "hands-off" automated test flying of the Republic F-105D Thunderchief describes "the first successful demonstration by any aircraft of the integration of an autopilot with an all-weather navigational and fire control system."

The all-weather version of the Mach 2 fighter-bomber is currently being phased into service with the Air Force. The test flights originated from Eglin AFB, Fla. and the Republic plant at Farmingdale, Long Island, N. Y.

One sortie, a simulated low-altitude bomb-toss mission off the Atlantic coast flown by Republic Test Pilot Carl Ardery, was described this way in the report:

"Ardery took off from Farmingdale and climbed 35,000 feet, where he engaged the aircraft's altitude-hold to level the ship. Then he set the doppler navigator, which banked the aircraft into a turn until it reached the proper destination heading and automatically rolled out on its course to the target.

"Flying hands-off at 680 miles per hour, Ardery turned on the aircraft's Mach-hold instrument, for constant speed, and descended to 5,000 feet, 80 miles from his target, in preparation for an over-the-shoulder low-altitude bomb-toss maneuver. A simulated bomb release was executed by the aircraft's Thunderstick fire control system, which then half-looped the ship on its escape path, rolled it into normal altitude and headed it back to Farmingdale."

The entire mission, reported Ardery, was completely automatic, with the only pilot duties once in flight being those of instrument setting for altitude and speed constants, pushing the button that sets the bomb computer in action, and observing the radar screen at various check-points along the way to correct minor variations.

A second automatic flight described in the report was made by Lt. Col. John Kropineck, pilot at the Air Proving Ground Center at Eglin. On a flight from Mobile, Ala. to Eglin, said Colonel Kropineck, his altitude of 26,500 feet "never varied a foot." He termed the entire flight "very impressive."

The F-105 Thunderchief is now in service with the 4th Tactical Fighter Wing. Advanced electronics in the "D" model make it possible for a pilot to take off in foul, ceiling-zero weather, fly "blind" to the target, come in low "on the deck" beneath radar detection, unleash a nuclear or thermonuclear bomb automatically and safely escape the bomb blast, Republic officials said. They added that "it can do the same thing from 50,000 feet."

MEMO--

THE POWER OF A SINGLE SENATOR to block legislation favored by a majority of his colleagues is nowhere so sharply pointed up as in the case of the pay equalization bill. Although the measure was passed unanimously by the House, was proposed by the Republican President and is endorsed by the Democratic leadership, as well as by large numbers of Senators, action has been held up by one Senator—Senator John C. Stennis (D-Miss), chairman of the Senate Armed Services Subcommittee to which the House bill has been referred.

THE SENATE COMMITTEE CALL FOR AN INDEPENDENT STUDY of retired pay (see story on first page), can be viewed only as diversionary tactics to delay action on the pay equalization bill.

THERE IS HOPE however that, with the leaders of both parties supporting the corrective measure, action can be taken to blast the bill out of Mr. Stennis' subcommittee and bring it to the floor where passage would be assured.

THE STRATEGIC TARGET PLANNING Deputy Director, RAdm. Edward N. Parker, 56, brings to the new Center at Offut AFB, Nebr., home of the Strategic Air Command, more than five years experience in special weapons assignments. He served from 1952-1954 as Deputy Chief of the Armed Forces Special Weapons Project. In 1957 he returned to AFSWP, subsequently redesignated the Defense Atomic Support Agency, as Chief. Admiral Parker during the first 11 months of WWII won three Navy Crosses and the Silver Star as a destroyer commander.

A SENIOR ARMY MAJOR GENERAL will be named to succeed Admiral Parker as DASA Chief. He must outrank the senior officer in DASA, Maj. Gen. Harold C. Donnelly, USAF, who heads the Field Command at Sandia Base, N. M. Present Deputy Chiefs of DASA are Brig. Gen. Richard H. Harrison, USA; and Brig. Gen. Douglas C. Polhamus, USAF. A junior Navy rear admiral will be named a new Deputy Chief.

PRESIDENT EISENHOWER'S NOMINATION of General Nathan F. Twining, JCS Chairman, for four-star rank on the retired list is a likely reason for the announcement during the August session of Congress of his retirement at a later date. If the nomination had not been made at this time and if General Twining had left Service before the new Congress convened, he would have retired in the permanent rank of major general, pending later action to gain Senate confirmation for four-star rank on the retired list.

THE SITUATION IS THE SAME for General Lauris Norstad, NATO SACEUR. There has been much speculation about his possible retirement. If no announcement is made before the current Congressional session adjourns, it can be expected that General Norstad will serve at least through next January.

WITH THOUSANDS OF SERVICE YOUNGSTERS heading for schools, parents will want to make certain their children are informed of their rights under the MediCare Program. As reported on Page 18, children of active duty Service people who are away from their homes to attend school are eligible for medical benefits. Such students should make certain they have a Uniformed Services Identification and Privilege Card to expedite care in event of an emergency.

UNDER ORDERS FROM GENERAL BRUCE C. CLARKE, who has begun his third year as CG at CONARC, Ft. Monroe, Va., the Army is stepping up its training for combat at night. This year, Reserve components soldiers are spending four nights in the field during summer training.

B-52 MODIFICATIONS during the next three years will cost more than \$250 million. Structural changes are being made to provide a low level bomb run capability. Addition of new counter-measure devices and increased armament, including Hound Dog and Quail missiles, will require an increase in the number of electronic equipment "black boxes" from 220 to 275.

THE AIR FORCE Cofs MAY BE GROUNDED by a Central Flight Status Selection Board which will meet at the Pentagon in October. It will consider hundreds of rated Air Force officers for suspension from flying duties. A large number of those to be grounded to meet Congressional budget restrictions will be from among officers, such as General Thomas D. White, who have more than 20 years rated service. They can be taken off flying status without loss of flying pay.

THE AIR WAR COLLEGE at Maxwell AFB, Ala., has enrolled its youngest class. Average age of the 173 students is 39. Last year it was 41.

NO SURPRISE HERE: The Army has completed a special world-wide survey to determine its officer requirements. The result: "Generally, all commanders reported a requirement for more officers than programmed." The follow-up: "Additional officer spaces and grades in excess of authorized ceilings are not now available and it does not appear likely that this situation will change in the foreseeable future," the Army told the field.

THE ARMY WILL USE THE DATA obtained in the study in support of proposed changes in the Officer Grade Limitation Act. Any action to liberalize officer promotion opportunities in the Services will be linked to the work of the Bolté Committee, which is reviewing the Officer Personnel Act of 1947. This delay is certain to jeopardize chances for amendment of the OGIA in the next session of Congress.

THE ARMY ANTICIPATES that by the end of next June, it will have a Regular Army enlisted strength of 80%. During the past two years, the volunteer content of the Army has increased from 64.7 to 75.4%, notwithstanding the fact that thousands of marginal caliber soldiers have been released from active duty.

IN RESISTING EFFORTS TO CUT the ROTC program, the Army will make the point that more than a third of its officers now on active duty have come from that program. At present, there are 248 universities and colleges with ROTC activities, with an enrollment of more than 155,000 cadets. The Bureau of the Budget has been maintaining that, since the Army commissions about 14,000 ROTC officers annually, it should be possible to cut the size of the program at the freshman and sophomore levels. The Army is resisting this attack, and has received some powerful support from Capitol Hill.

THE ARMY'S PICATINNY ARSENAL at Dover, N. J., is the home for much top-secret work on nuclear warhead construction. It is also where Maj. Walter J. Doyle, Director of the Arsenal's Quality Assurance Division, conducts a one-man wildlife conservation program at his own expense. He raises English Ringneck pheasants to the age of 12 weeks, when he bands each of them with an aluminum ring bearing his name and address and releases them. His hope is to increase the pheasant population in the Morris County area of New Jersey.

THE FIRST TWO CHINESE NAVAL OFFICERS to receive submarine training in the U. S. are enrolled at the New London, Conn., Submarine School. They are LCdr. Shang, Tao-Tsan and LCdr. Tuan-Mu, Ning.

THE NAVY IS SHORT about 1600 chief petty officers in critical specialties, including nuclear and electronics fields. Navy officials expect to fill the CPO gap by "inviting" chiefs slated for the Fleet Reserve to stay on another year. As revealed in previous issues of *The Journal*, the

Navy is also short about 7,000 junior officers, has not met its needs for pilot training applicants, must tap high schools in order to obtain enough nuclear sub volunteers and is having a difficult time in retaining technically skilled enlisted men in all grades.

SECRETARY OF DEFENSE GATES made it a point to stress in his address to the VFW in Detroit this week that his position "is not just a matter of dealing with papers, important as that is. It also means getting out of the Pentagon and getting into the factories, the laboratories, the missile test complexes, flying out to the carriers and checking on the readiness of our forces at home and overseas."

THE SECRETARY'S REMARKS emphasize the growing importance of the position of Deputy Secretary of Defense, now occupied by James H. Douglas, jr., who ably takes the reins of the Defense Department in Mr. Gates' absence. Intensified field trips by the Secretary of Defense, however, might well force the creation of another top Defense office, on the level of Deputy Secretary, to care for the day-to-day housekeeping and administrative chores which are a heavy burden to both Secretary Gates and Deputy Secretary Douglas.

COLUMBUS WILL LAND 3 September at New London, Conn. Sailing aboard the 295-foot, square-rigged training barque *Eagle*, Capt. Charles E. Columbus, head of the Department of Engineering, is commanding the U. S. Coast Guard Academy's 1960 Cadet Practice Squadron on a two-week cruise along the East Coast, ending next week.

ARMED FORCES LANGUAGE TRAINING is a certain subject for study by Congressional Appropriations Committees next year. A likely candidate for "expert" testimony is Professor Mario Peix of Columbia University, a renowned linguist. He was at the Army's Language School at the Presidio of Monterey this summer as a consultant to Col. James L. Collins, jr., Commandant. It is the Professor's view that the Government should double the size of the Monterey school and concentrate all foreign language training there.

THE AIR FORCE last year dropped out of participation in the Army Language School, claiming that it could train its people more effectively elsewhere. The Navy has its own language training facilities.

ARMY AVIATION MEDICINE will get increased emphasis with the start of a new residency program. It will see young medical officers given four years of specialized training, some of it at the Air Force or Navy Schools of Aviation Medicine. The Army has 54 aviation medical officers, needs 70 for current billets.

MARINE RETIREMENT AND AIR NATIONAL GUARD service don't mix according to a recent decision of Comptroller General Joseph Campbell. Deciding the case of retired Marine T/Sgt. Donald S. Sutton, Comptroller Campbell said he could not validly hold a status in the Montana Air National Guard since he would be subject to conflicting calls to active duty in time of emergency.

THE MISSILE CRUISER CANBERRA has become the first ship of its kind to circle the globe. Under command of Capt. Walter H. Baumberger, she has joined the Sixth Fleet in the Mediterranean after transiting the Suez Canal en route from duty with the Seventh Fleet in the Pacific. Canberra, after service last year with the Sixth Fleet, was outfitted in Norfolk before departing 3 March on a trip around the world. She took part in Australia's annual commemoration of the Coral Sea Battle.

NATO COUNTRIES ARE EXPRESSING INTEREST in procurement of the Army's Redeye missile now under development. It is a shoulder-fired weapon which will be used by soldiers against attacking aircraft.

M/G Cooper Tells XXI Corps Changes

Maj. Gen. Ralph C. Cooper, XXI Army Corps CG at Indiantown Gap, Pa., has announced changes in top-ranking staff personnel.

Col. Robert B. Collier has been named Deputy Commander for ROTC Affairs, replacing Col. Thomas Mifflin, USA-Ret.

Replacing Colonel Collier as G-4 is Col. Clifford C. Hines recently returned from Korea.

Col. Marion G. Williams has been appointed G-1 to replace Lt. Col. John A. Benner, reassigned to US Army Pacific at Ft. Shafter, Hawaii.

The XXI Corps is responsible for the Army Reserve and ROTC programs in Pennsylvania, Delaware, Maryland, Virginia and the District of Columbia. Presently, there are close to 42,000 Army Reservists in over 550 active Reserve units in the Corps area. Some 20,000 ROTC cadets in ROTC detachments of 39 colleges and universities in the four-state and District of Columbia area are under jurisdiction of the Corps.

Elm MAAG, Taiwan, Taipei.
Wallinski, W-3 Lee Roy M, Presidio/SF, to
Stu Det, USAMOAMA, St Louis.

GIMLET COMMANDER

Col. Harold V. Maxner has assumed
command of the 21st Infantry Gimlets
at Schofield Barracks, Hawaii, replacing
Lt. Col. Joel T. Walker.

A recent graduate of the Army War
College, Colonel Maxner also graduated
from the Infantry School and the Com-
mand and General Staff College there.

Col. Maxner was accompanied to Ha-
waii by his wife, Helen, and their three
sons.

Among his awards, Colonel Max-
ner holds the Bronze Star with Oak
Leaf Cluster, the Purple Heart with
two clusters, and the Combat Infantry
Badge with Star.

Amphibious Copters For ARADCOM Units

Army Air Defense Command units will
have eight of their Piasecki H-21 heli-
copters modified with flotation equip-
ment by the end of September.

Five will be assigned to East Coast
units, and the other three to the West
Coast. First of the eight was recently
delivered to the Third Air Defense Ar-
tillery Group, at Norfolk.

The H-21's will be used to carry per-
sonnel and equipment to and from
ARADCOM sites in their respective
areas. Because much of their travel will
be over water, the amphibious equip-
ment will add convenience and safety.

Koran, W-3 George H, Ft Devens, to Hq US-
ASA, Europe, Frankfurt, Germany.
Lopez, W-2 Laurence C, Ft Meade, to TUS-
LOG, Det 4, APO 133, NY.
Monk, W-2 Wallace E, Ft Lewis, to 12th
USASA Fld Sta, Chitose, Hokkaido, Japan.

To Germany

Akerson, W-2 Donald D, Orland Pk, Ill.
Chester, W-4 Charles W, Ft Belvoir.
Knowles, W-2 Robert W, Ft Bliss.
Kosek, W-3 A V, Ft Campbell.
Coker, W-2 Marion L, Ft Huachuca.
Helmold, W-4 N C, Livingston, NJ.
Camera, W-2 V C, Ft Bliss.
Chase, W-2 Delbert H, Ft Bliss.
Clarke, W-2 James J, Pittsburgh, Pa.
Hardin, W-2 Ernest P, Selfridge AFB.
McKinley, W-2 Carl E, Selfridge AFB.

Join Vicenza Missile Unit

Two new staff assignments for the 1st
Army Missile Command at Vicenza, Italy,
are announced by Col. Robert E. Coffin,
Commanding Officer.

Capt. Albert A. Covington, recently ar-
rived from Ft. Belvoir, Va., has been
named Judge Advocate for the Com-
mand. Named to the position of In-
formation Officer is Capt. Robert M. Smith,
formerly Public Information Officer at
the Army War College, Carlisle Barracks,
Pa.

Gold, Clarence B, Jr, CE-USAR.
Dudding, W C, QMC-USAR.
Stevens, Winfred G, Arty-USAR.
Rice, Charles H, Arty-USAR, as LtCol.
Kochy, Stephen B, CE-USAR.
Hudson, Roger W, Inf-USAR.
Phifer, Ollie A, CE-USAR.
Heron, William E, Jr, SigC-USAR, as LtCol.
Parnelle, M H, Arty-USAR, as LtCol.
Barkley, Hillard R, Inf-USAR.
Neal, Letty G, ANC-USAR, as LtCol.
Constantino, J S, SigC-USAR.
Burger, Lawrence J, Arty-USAR.
Shaydak, J C, SigC-USAR.
McCullough, W W, AGC-USAR.
Colo, Francis W, AI-USAR.
Nelson, Thomas S, Jr, MSC-USAR.
Swartz, Thomas S, CE-USAR.
Black, Clayton D, CE-USAR, as LtCol.
Peters, Henry T, Arty-USAR.
Levett, Joseph C, Inf-USAR, as LtCol.
O'Brien, Francis J, Armor-USAR.
McClellan, John A, QMC-USAR.
Moriarty, Francis E, Arty-USAR.
Horton, Charlie T, Arty-USAR.
White, Leo A, Inf-USAR.

Captain

Boothe, Gilbert, Arty-USAR, as Maj.
Parker, Willard V, MSC-USAR, as Maj.
Blake, James F, SigC-USAR.
Manganello, Arthur, FC-USAR.
Coen, Kendall W, QMC-USAR, as Maj.
Breaux, Allen C, SigC-USAR, as Maj.
Sorensen, Reuben S, Armor-USAR.
Biaggio, Amil Del, Arty-USAR.
Gonyo, W C, CE-USAR.
Rodriguez, Luis R, Inf-USAR, as Maj.
Dawson, Charles D, SigC-USAR.
Handfield, C K, SigC-USAR, as Maj.
Cooper, James S, 3d, QMC-USAR, as Maj.
Alken, Richard S, TC-USAR, as Maj.
Zielinski, A F, Inf-USAR, as Maj.
Bean, Robert A, Arty-USAR, as Maj.
Hiers, Robert E, QMC-USAR.
Evans, George S, CE-USAR, as Maj.
Miller, Sewell A, Inf-USAR.

Chief Warrant Officer

Waldrop, W-3 Louis G, USAR, as W-4.
Dubuc, W-4 (W-3) Joseph M, Arty, as W-4.
Crowell, W-2 William L, QMC, as W-3.
Murphy, W-2 Gordon G, AGC.
McGarrigle, W-3 John T, TC.
Wilson, W-2 Julian C, Arty.
Molenda, W-2 Edwin A, SigC.
Linker, W-4 Roland O, QMC, as Col.
Jackson, W-3 Newton L P, AGC.
Gehr, W-2 Lawrence A, Arty.
McCarthy, W-2 Lester, AGC.

Holiday Article Sees Army Taking To Air

A stirring picture of the U. S. Army, its past achievements and its present problems, is drawn by Charlton Ogburn, Jr., a veteran of WWII ground fighting in Burma, in a beautifully illustrated article in the September issue of *Holiday* magazine.

"Anyone whose idea of the Army dates from the early 1940s," Mr. Ogburn writes, "is impressed by the imagination that goes into training nowadays. Realism in Army maneuvers has been vastly enhanced by the creation of a regular Aggressor Force to provide a convincing enemy."

The Army's only hope, the author writes, is to make up in quality what it lacks in quantity.

Mr. Ogburn believes the Army will increasingly take to the air. "Flying cranes," he says, "helicopters that can carry a 60-ton load—and winged infantrymen with instrumented helmets and goggled antiradiation garb, will be the commonplaces of tomorrow's action."

In a critical vein Mr. Ogburn writes that "The Army of today, recognizing that the best equipment in the world will not make a military force in the absence of *esprit de corps*, is yet driven to eliminate much of what makes for *esprit*. Change, conformity, utility—all fatal to *esprit*—these are among the Army's idols, perhaps because it is trying to be American, perhaps because it is American."

But he is deeply impressed with the spirit of the Army and its fighting elements. "To join a combat outfit," he writes, "is like accepting the medieval ordeal by fire as a test of virtue. You subject yourself to a judgement few civilians ever experience. It is the judgement of those from whom there is no hope of hiding anything—your dead predecessors and your living comrades. You have to live with them both, and if you cannot live with them, you will find how hard it can be to live with yourself. If, on the other hand, you pass muster, the rewards are also of a kind that few civilians know."

CANTIGNY MUSEUM HONORS "BIG RED ONE"

THE \$1,000,000 Cantigny War Memorial Museum of the 1st Division was dedicated 20 August in Wheaton, Ill. Constructed under terms of a bequest of the late Col. Robert R. McCormick, publisher of the Chicago Tribune, the museum honors the history of the Army's first divisional-sized unit.

Visitors to the museum will see recreated the battles at Cantigny, France, in May 1918 and the historic landing at Omaha Beach on the coast of Normandy in June 1944.

The Cantigny and Omaha Beach dioramas are only two of the museum's unique features. Inside the 120-foot main hall are a German pillbox, a collection of weapons used by American fighting men, and an actual WWI trench, complete with mannequins of WWI soldiers.

Colonel McCormick was a battalion commander in the Division's 5th Field Artillery Regiment during WWI. He maintained a long interest in the 1st Division, and after his death the trustees of the Robert R. McCormick Charitable Trust established the Cantigny 1st Division Foundation to arrange for the construction of the museum.

Arthur A. Schmon, president of the Ontario Paper Co. and Colonel McCormick's adjutant in the 5th Field Artillery, served as President of the foundation, which retained the noted Chicago architect Andrew Rebori to design the museum. Using as a base the brick stables which once housed Colonel McCormick's hunters, Mr. Rebori has enlarged the structure to include a circular wing which houses the division archives and a military library.

To serve as curator of the museum, the trustees have appointed Captain Henry J. Kelly, USA-Ret., who spent 20 of his 23 years in the Army with the 1st Division's 18th Infantry Regiment.

Weapon System T-238 Wins Army Approval

A NEW weapon system capable of quickly and effectively saturating an area with chemical agents has been developed by Arthur D. Little, Inc. and adopted by the Army.

Designated "Weapon System T-238" and recently standardized as the M-55, it fires in rapid salvos 45 chemical-carrying rockets from the tubes in which they were packaged. For its effectiveness, the system capitalizes on the normally undesirable scatter characteristics of multiple launched rockets.

M-55 rockets are six-feet four-inches long and about four and one-half inches in diameter. Stabilizing fins, folded to fit in fiberglass shipping-launching tubes, open automatically when the rockets are fired. Solid fuels propel the rockets and point-detonated explosive charges disperse chemical agents packed in nose-cone cavities.

In less than 20 minutes, a small crew of men can load the launcher with 45 rocket-containing tubes, plug in electrical connections, and launch a salvo using regular artillery-type fire control techniques. The aluminum sections of the launcher are all portable and an assembled unit can be transported by helicopter or be mounted in a two-and-one-half ton truck.

Norris-Thermador Corporation of Los Angeles produced components during the development period as a subcontractor for Arthur D. Little, Inc., and is now engaged in production.

AIR DEFENSE GETS "SOME ROUGH HANDLING"

The North American Air Defense at Colorado Springs, under Command of General Laurence S. Kuter, USAF, celebrates a third anniversary on 12 September.

In connection with this event, a comprehensive press release from NORAD Headquarters tells of progress that has been made in continental air defense. That statement acknowledges that during the past 12 months NORAD "has been given some rough handling."

The press release continues as follows:

As NORAD's third year opened, last September, its planned long-range fighter, the F-109—a 2,000 mile-an-hour interceptor that could patrol as far as the Distant Early Warning Line or 1,000 miles out to sea to hit an enemy as far from his target as possible—was cancelled.

Reductions in F-106, F-102 and F-101 fighters, programmed because a number of F-108 units were to be provided, were speeded up, even though the latter were scrubbed.

The Bomarc interceptor missile program was cut severely, but later was partially restored.

Construction of NORAD's subterranean combat operations center came to a halt after a \$1 million access road to the site was built, and no definite plans for going ahead with the project have been announced.

A year ago, NORAD counted on keeping track of all aircraft in continental air space and effectively assigning interceptor weapons to hostiles by a secure command and control system of underground SAGE super combat centers. This program was cancelled.

The remaining above-ground SAGE system has no protection against blast, nor does it have the capacity to handle both civilian and military air traffic, which greatly reduces NORAD's ability to differentiate between friend and foe.

The Navy pulled its radar-carrying picket ships off the seaward extensions of the DEW Line, leaving a sizable hole in NORAD's warning network.

Although the threat of the intercontinental ballistic missile steadily increases, there is still no decision to go past research and development on the Army's Nike Zeus, the only ICBM killer which could be on station and in operation by the mid-1960's.

USAF Orders

From page 9—

VanCleave, Ray E, as Maj.
Hill, William J, as Maj.
James, William H, Jr, as Maj.
Dean, Richard E, as Maj.
Hans, William R, Jr.
Poe, Charles W, Jr.

Col. Watson Leaves Nuclear Test Post For Warfare Systems School Duty

COL. Lawrence M. Watson has been named Deputy Commandant of Air University's Warfare Systems School at Maxwell AFB, Ala. He succeeds Col. Britt S. May, now Commandant.

Colonel Watson's last assignment was as Director of Operations for Joint Task Force-SEVEN, the overseas nuclear test organization with headquarters at Arlington, Va.

While with JTF-7, which he joined in 1958, Colonel Watson, USMA-43, saw duty at Eniwetok and Marshall Islands as operations officer. He was a member of the organization that detonated two missile-borne nuclear weapons at high altitude over Johnston Island in the Pacific in August 1958 as part of a program to develop an anti-ICBM defense. This was during Operation Hardtack, in which he served as Johnston Base Commander.

Colonel Watson is married to the former Barbara Moffat of Orlando, Fla. Their children are Larry, 16, Tom, 13, and Kate, 7.

JAG WIVES HONOR BAR ASSOCIATION VISITORS

THE ladies of the Army Judge Advocate's Wives' Club will hold a coffee at 10 a.m. on 30 August at Patton Hall, Ft. Myer, Va., to honor the wives of the Reserve and Retired Army Judge Advocates attending the American Bar Association Convention, 29 August-2 September, in Washington, D. C.

Army guests of honor will be Mrs. Wilber M. Brucker, wife of the Secretary; Mrs. Lyman L. Lemnitzer, wife of the CofS; Mrs. George H. Decker, wife of the Vice CofS; Mrs. John D. Randall and Mrs. Whitney North Seymour, wives of the President and President-Elect of the American Bar Association.

The honored guests will include Viscountess Kilmuir, wife of the Lord High Chancellor of Great Britain; Lady Russell, wife of the Judge of the High Court of England; Lady Hinchcliffe, wife of the Judge of the High Court of Justice of England; Mrs. Reynault St. Laurent, wife of the President of the Canadian Bar Association; Mrs. Homer Ferguson, wife of a Judge of the Court of Military Appeals; Mrs. J. Vincent Burke, Jr., wife of the General Counsel for the Department of Defense; Mrs. Frank G. Millard, wife of the General Counsel for the Department of the Army; Mrs. Albert M. Kuhfeld and Mrs. William C. Mott, wives of the Air Force and Navy Judge Advocates.

In the receiving line, besides the Guests of Honor, will be Mrs. George W. Hickman, Jr., Mrs. Stanley W. Jones, Mrs. Charles L. Decker, and Mrs. Clio E. Straight, wives of the Generals of the Army Judge Advocate Corps; Mrs. Edward H. Kurth, President of the Army Judge Advocates Wives' Club, and Mrs. James K. Gaynor, Chairman of the function.

Welcome To Carlisle

WIVES of students attending the new class at the US Army War College, Carlisle Barracks, Pa., were greeted at a Welcoming Tea by members of the Officers' Wives Club, Mrs. Bruce Palmer, Jr. (seated) pours for Mrs. James A. Betts, a newcomer to the post, as they talk with Mrs. Richard J. Long, president of the Club.

SAC Will Test Relocatable Homes

TWO relocatable houses will be tested at Offutt AFB, Neb., during the next 10 months.

If they can stand the wear and tear of relocation and frequent changes in occupancy, SAC may seek relocatable housing at its missile sites and remote bases as an augmentation to housing available from other sources.

Brig. Gen. James B. Knapp, Command Director of Civil Engineering, said the houses will be relocated at least once during the test period. Incoming personnel may use the quarters as guest houses while seeking permanent housing.

Each of the two test houses was shipped to the base in two sections, set on foundations, bolted together and weather sealed. They contain nearly 1,000 square feet of floor space, have three bedrooms, a living-dining room, kitchen, one bath and five closets.

Each is fully furnished, and is also equipped with refrigerator, washer-dryer, range and garbage disposal. They will be centrally heated by natural or bottled gas, forced-air furnaces.

L/C Foery In Japan

Lt. Col. Frank R. Foery has been named Chief, Subsistence Supply Division, Office of the Quartermaster, at the Army Japan Depot Complex, near Tokyo. He reported from Richmond, Va.

Service Folk

Cadet Tracy M. Sharp was at Leavenworth, Kans., recently to visit his parents, Chaplain (Lt. Col.) William B. Sharp, USA-Ret. and Mrs. Sharp. He is a cadet at the U. S. Air Force Academy.

Chaplain Sharp, since retirement in February, has been Vicar of the Episcopal Mission of the Centurian at Ft. Leavenworth. Prior to his retirement he had been Post Chaplain there for more than five years.

Mrs. Betty Myers, wife of M/Sgt Harold E. Myers of Westover AFB, Mass., has won the 1960 world's women 20-gauge skeet championship. She picked off 99 of 100 targets to lead all other female contestants. Her husband was a member of the SAC skeet team, winner of the Air Force world-wide championship, and the USAF team, which won the interservice championship.

Lanny Boyd, son of Capt. and Mrs. Arthur L. Boyd, has received the highest honor in Scouting, the Eagle Award. Captain Boyd is with the 596th Signal Company, Army Infantry Center Troop Command, Ft. Benning, Ga.

Red Cross Aides

Capped At Robins AFB

Nine new Red Cross nurses aides have been capped at Robins AFB, Ga. They are Mesdames Thomas W. Ruark, George C. Walter, Jr., John F. Gull, Kenneth W. Wrede, Melvin W. Gehhardt, G. W. Magness, Eugene A. McKenzie, Stanley E. Allen, and Bruce M. Tobey.

Guest speaker at the ceremony was Maj. Josephine M. Becker, Chief of the nursing service at the base hospital. She was introduced by C. R. Somerville, Red Cross Field Director at Robins.

Chemical Wives Welcoming

The Chemical Corps Wives' Club will have its Welcoming Coffee for the new arrivals 9 September when Mrs. Adam Meetze, Hospitality Chairman, and her Committee, will greet newcomers at her home, 4926 N. 28th St., Arlington, Va.

L/C Adams Is Rotary Chief

Lt. Col. Peter P. Adams, Deputy Commander of the 3535th Civil Engineering Group of Mather AFB, Calif., has been installed as President of the Rotary Club of Rancho Cordova, Calif.

Defense Traffic Agency Will Brief Carriers On Uncrated Household Goods

THE Military Traffic Management Agency has scheduled a series of seminars to brief commercial carrier representatives on recently revised policies and procedures governing the shipment of uncrated household goods of Department of Defense personnel.

Maj. Gen. I. Sewell Morris, Executive Director, said all household goods carriers are invited to attend these seminars, which will be conducted by key MTMA officials at locations offering favorable accessibility to carriers throughout the country. These briefings are scheduled as follows:

9 Sept., San Diego; 14 Sept., San Francisco; 17 Sept., Seattle and 21 Sept., Denver. 12 Oct., Chicago; 19 Oct., Dallas; 22 Oct., New York; 26 Oct., Atlanta and 29 Oct., Jacksonville. 2 Nov., Washington, D. C.

On 1 July the Department of Defense published a directive (4500.27) to delineate its policy for transporting uncrated household goods of military and civilian personnel. In implementation of that directive, MTMA has prepared traffic management procedures designed to assure highest quality moving services at the lowest over-all cost to the Government. The purpose of the MTMA seminars is to insure uniform interpretation and implementation of the new policies and procedures governing household goods shipments. Similar seminars will be held to orient transportation officers of the military services.

Carriers desiring to attend the seminars are asked to give written notification to the regional director of the host region, stating the names of attendees, their organization, and the specific seminar they desire to attend. So that adequate reservations may be made, this notification should reach the regional director at least 10 days prior to the scheduled date of the seminar.

The mailing addresses of the regional directors are as follows:

Many Service Families Fail To Take Full Advantage Of MediCare Benefits; Half A Million Letters Required Annually Because Of Confusion On Rules

MILITARY families need a MediCare education, according to MediCare Director Brig. Gen. Floyd L. Wergeland, MC, USA.

A minimum of 15%, and in some areas 50%, of all MediCare claims submitted for payment are filled out improperly by Service family members.

Scores of thousands of Service family members still have not obtained their basic MediCare pass key, a Uniformed Services Identification Card.

General Wergeland says that untold numbers of Armed Forces' members are unnecessarily paying family medical bills out of their own pocket, because they do not know what MediCare benefits are available to them.

These facts are causing increasing concern to the Office for Dependents Medical Care, headed by General Wergeland.

He estimates that half a million letters

are generated each year because military families do not understand the MediCare program, do not fill out the forms properly, or lacked the Uniformed Services Identification Card.

Confusion about the MediCare program, General Wergeland asserts, unnecessarily costs millions of dollars, which could better be used to provide more care for military family members.

Biggest single problem at the present time, General Wergeland says, is the failure of military family members to obtain the identification card.

In an emergency, MediCare authorities can use other means to establish a family member's entitlement to MediCare benefits, but this usually takes two or three letters to the military sponsor's duty station and other military authorities. Such letters raise the cost of administering the program.

In many cases, the MediCare Director

says, military personnel go overseas without providing their families in the ZI with the necessary identification card or with a thorough knowledge of their benefits under the Dependents Medical Care Program.

Such negligence, General Wergeland says, often results in irritating delays in MediCare processing and in many cases has resulted in the failure of Service family members to request the benefits granted to them by Congress.

"I want to emphasize," General Wergeland says, "that no one needs to go without care if they are spouses or children of active duty military personnel."

Each member of a military family, General Wergeland says, should acquaint himself with the full benefits available under the Dependents Medical Care Program.

"For example," he says, "I don't know how many people know that when their

sons or daughters go away to school or college they are dependents living apart from their sponsor and are entitled to MediCare benefits."

It should be remembered, General Wergeland adds, that MediCare is supplemental to the services provided for family members at military medical facilities.

It is not primarily an out-patient program, although emergency out-patient treatment of injuries and routine maternity out-patient treatments may be paid for by the Government under MediCare.

He says that for Service family members residing apart from their sponsors, MediCare benefits are automatically available. Those residing with their sponsor must, however, secure a certificate of "non-availability" of medical care facilities from their military station in order to qualify for benefits under the MediCare program.

Service Weddings and Engagements

ST. ALBAN'S EPISCOPAL CHURCH, Wash- ington, D. C., was the setting for the evening ceremony 20 August, uniting in marriage Miss Leslie Ann Wyman, daughter of Mrs. Leslie Haynes Wyman of 2927 Cathedral Ave., N. W., Washington, and the late Colonel Wyman, USA, and Mr. Warren John Randolph, son of Mrs. Martin Francis Randolph of Forest Hills, N. Y., and the late Mr. Randolph.

Photo by Glogau
Mrs. Randolph

Given in marriage by her uncle, General Willard Gordon Wyman, USA-Ret, of Damariscotta, Me., the bride chose Mrs. Clarence Henry Breedlove, Jr., as her matron of honor, and Misses Grace Bears and Cordie Jo Fletcher as bridesmaids, with little Misses Ellen Gould, niece of the bridegroom, and Christine Lehner as flower girls. Mr. Robert Gould served as best man and ushering were Messrs. Samuel H. Wyman, brother of the bride, H. R. Josephson, W. P. Archer, and Eldridge Mauleby.

Mrs. Randolph, who was graduated from Colby College and the Harvard Graduate School of Education, recently completed a year of High School teaching at Menlo Park, Calif. Her husband, a graduate of Colgate University, is a geologist with the Sun Oil Company. The couple expect to live in Karachi, Pakistan.

are Mr. and Mrs. Edward L. Turkington of Atherton, Calif.

Attended by Miss Linda Morgan as maid of honor, her two sisters, Misses Jean and Judy Lamoure, Mrs. D. C. Horner, sister of her bridegroom, and her cousin, Miss Cecily Putnam, with little Miss Blair Horner, niece of the bridegroom, as flower girl, the bride was given in marriage by her father, Mr. Douglas Horner was best man and ushers included Messrs. R. N. Ruggles, J. Christianson, S. Arnot and W. Whitehead.

A graduate of the American High School, Kaiserslautern, Germany, and the University of Maryland's Munich branch, Mrs. Turkington is the daughter of the Deputy Commander of Redstone Arsenal. Her husband is a graduate of Southern Methodist University and is now employed by Kaiser Steel, San Francisco, where he and his bride will make their home at 1159 Green Street.

SCHULTE-O'NEILL — In a morning ceremony at the Church of St. Andrew the Apostle, New Orleans, La., 20 August, Miss Joan Theresa O'Neill, daughter of Mrs. John O'Neill of New Orleans, and Lt. Jean H. Schulte, USN, were united in marriage by the bride's brother, Father John J. O'Neill, Cdr., USN. The bridegroom is the son of Mr. and Mrs. Joseph H. Schulte of Marysville, Kans.

Photo by Stempel
Mrs. Schulte

Attending the bride, who was given in marriage by her brother, Capt. James P. O'Neill, AFNG, of Mitchell Field, Wis., was Mrs. Herbert J. O'Connor, wife of Colonel O'Connor. Mr. Carl Schulte was best man for his twin brother, and groomsmen included Capt. James Burke, LCDR. James D. Pollen, Lts. William Pieve, James D. Hessman, Donald M. Ulmer and Joseph K. Pinnell.

Mrs. Schulte is a graduate of the University of Minnesota's College of Education and her bridegroom is USNA '53.

ENGLE-KNAPP — Announcement has been made of the engagement of Miss Corliss Knapp, daughter of Mrs. Harry Marvin - Smith, wife of Captain Marvin - Smith, USN, of Vienna, Va., and Mr. Arthur Knapp, Jr., Larchmont, N. Y., to Dr. Ralph P. Engle, Jr., son of Mrs. Engle of Fremon, Ohio, and the late Mr. Engle.

Miss Knapp, a graduate of Middlebury College, where she majored in French, has been employed at Harvard University's School of Education. Her husband, who is a graduate of Western Reserve University and the Harvard Medical School, is currently serving as Chief Resident in Psychiatry at the Massachusetts Mental Health Center, Boston.

A December wedding is planned.

WILLIAMS-TANNER — Miss Velma Tanner, daughter of Mr. and Mrs. Curtis Tanner of El Paso, Tex., was married 1 August to Capt. Edward Williams, Asst. Operation Officer of the 3d Air Defense Artillery Group, Norfolk, Va., at the Center Chapel, Ft. Bliss, Tex.

DANIEL-BEDSON — Mr. and Mrs. Charles Bedson of Royal Oak, Mich., announce the marriage of their daughter, Jeanette Elizabeth, to Lt. Richard A. Daniel, (USMA '60) in an evening ceremony 6 August at St. John's Episcopal

Church, Royal Oak. The bridegroom is the son of Col. (USA-Ret) and Mrs. S. A. Daniel of 1002 Orchard Grove Dr., Royal Oak.

The bride was given in marriage by her father and chose her sister, Miss Carolyn Bedson as her only attendant, and Lt. Frank Cloutier, a classmate of the bridegroom, was best man. Ushers were Lts. Arthur Judson, USMA '60, David MacCauly, USMA '60, and Thomas Atkinson, USAFR.

WATERBURY-ANDERSON — Maj. Gen. Charles H. Anderson, USAF, of Lowry AFB, Colo., announces the engagement of his daughter, Kathryn Marie, to Lt. Mark Henry Waterbury, III, USMC, son of Mr. and Mrs. Waterbury, Jr., of Utica, N. Y.

Miss Anderson

Miss Anderson, daughter of the late Mrs. Anderson, studied at Paris, France, and at the University of Maryland's Munich, Germany branch, before entering Mary Washington College of the University of Virginia at Fredericksburg, where she is now a senior student. Her father has just assumed command at Lowry AFB, following a tour of duty at Headquarters, USAF in Washington. Her fiancé, presently stationed at Camp Lejeune, N. C., attended the Manlius School and is USNA '57.

HUGHES-HURLEY — Miss Mercedes Hurley, daughter of Mrs. George A. Hurley of Shaker Heights, Ohio, and the late Mr. Hurley, was married 18 August to Capt. John B. Hughes, USA, son of Col. (USA-Ret.) and Mrs. John B. Hughes of San Francisco, Calif., at St. Paul's Chapel, the Italian Embassy, Ankara, Turkey.

The Chief of Staff of the Combined Military Planning Staff of the Central Treaty Organization, Maj. Gen. T. Scott Riggs, USA, gave the bride in marriage and she was attended by Mrs. Robert McSheehy, Maj. Charles Bonaventura, USA, was best man and ushering were Lts. Robert McSweeney, USN, and Robert Wilson, USAF.

Mrs. Hughes, a graduate of Marquette University, who attended Western Reserve University, Oxford University and the Sorbonne, was a member of the staff of USIS in Ankara. Now a member of the staff of the Combined Military Planning Staff, CTO, Captain Hughes, a graduate of the USMA, attended VMI and received a Master's degree from the University of Virginia.

Mrs. Hughes

Service Club Celebrates

COMMEMORATING the 15th anniversary of V-J Day at the Officers' Service Club, 21st and R Sts., N.W., Washington, D. C., at its annual dance are seen here (l to r) hostess, Miss Nancy Anderson; Vice President of the Club, Capt. Arnold Schneider; sponsor of the Friday evening hostess group, Mrs. Clyde B. Parker; and the President, Capt. Hal Wells. At the end of WWII, Mrs. Parker promised to sponsor an annual dance at the Club celebrating the end of hostilities, and the event has attracted large numbers of old friends and members each year. On this occasion, tribute was paid to Mrs. Parker's continued services to the Club over the many years.

MAAG SPAIN CHIEF AT LANGLEY

MAJ. GEN. Stanley J. Donovan has arrived at Langley AFB, Va., to assume duties as TAC Deputy for Operations after duty as Chief of MAAG, Spain.

A '34 USMA graduate, General Donovan became 12th Bomber Command A-2 in England in 1942; then commanded the 97th Bomb Group, North Africa, later in the year. In 1943 he was transferred to the War Department General Staff, Strategy Section of OPD.

At the close of WWII he was transferred to Argentina as Air Attache. He served in this capacity until 1948 when he was assigned to USAF Headquarters as Deputy Chief of the War Plans Division, Directorate of Plans, DCS/O. This assignment was followed in 1952 with a tour of duty as CofS, 21st Air Division (SAC), Forbes AFB, Kansas. In December 1952 he assumed command of the 40th Bomb Wing, Smokey Hill AFB. He became commander of the 14th Air Division (SAC), Travis AFB, in May 1953.

General Donovan is married to the former Margaret Roblee. They have two daughters, Sheila, 8, and Diana, 11, and one son, Frederic, 5½. General Donovan and his family will reside at Quarters 149 Benedict Avenue, Langley.

Maj. Gen. Donovan

Submarine Memorial At Pearl Harbor

Pearl Harbor, which was the center of submarine operations in the Pacific during WW II, will have a permanent Submarine Memorial by the end of October, located at the Pearl Harbor Submarine Base. The Memorial will honor both the submarine personnel who gave their lives and the submarines in which they were serving.

A total of 52 submarines failed to return with crews totaling some 3,500 men. The Memorial is being constructed of lava rock with a polished concrete facing. Forty-eight plaques, 12"x24" will adorn the wall of the Memorial. Forty-five of these will contain the name of the ship lost and each crewmember. Three plaques will carry the names of additional submarine personnel lost, together with the name of their ship.

Directly in front of the 52 by 9 foot wall will stand a 34 foot column, two feet thick and 5 feet wide. Diving dolphins will adorn the upper portion of this column. An introductory plaque, mounted at the front of the Memorial Column, will carry the dedication message.

The Memorial is being constructed from voluntary contributions received from personnel of the Submarine Force, Submarine Veterans of WW II, other submariners and their many friends.

The original plan for construction of the Memorial was conceived by Chief Torpedoman Robert J. Cornelius of 4379 Likini Street, Honolulu. With the backing of his seniors, the plan was forwarded for approval to the Commander of the Pacific Fleet Submarine Force.

PL 810 Retirements

The Army has placed the following named National Guard and Reserve officers on the retired list upon their attainment of age 60 and completion of at least 20 years' creditable service as provided under Title III, PL 810, 80th Congress:

Colonel

Boone, Rankin R
Krumm, Carl F
Burrus, Rufus B
Smith, Rulon E
Lind, Laurie P
Van Atta, F L
Marden, Harold C

Berman, Joseph E
Lutz, Alvin H
Shepard, John B
Malcolm, Don J
Kuehn, Riley
Line, Gerald C

Lt. Colonel

Bright, Everett W
Dieter, Edward J
Burack, Philip I
Keating, James M
Kelley, Francis J
Collier, Harold L

Moore, Harlin A
Girard, Harold H
Wood, Frank A
Stainton, William F
Cotner, Herman F
Ketcham, George H

Major

Creasey, George S jr
Barnes, Paul N

Smith, Thurmond S
Thompson, George H

Captain

Lufkin, Benjamin N

Statesir, Vernon A

1st Lieutenant

Harlin, Edgar F

Eddinger, Adolph G

Sergeant

DeSantis, Domenick

New Deputy At Tinker

Col. Thomas F. Kenny is the new Deputy Commander of Tinker AFB, Okla., following four years at the Pentagon. He succeeds Lt. Col. Harold J. Watters, now Chief of Base Services at Tinker.

RETIRED ACTIVITIES:

L/G Groves Heads Distaff Foundation; B/G Perry Gets Martin Titan Post

Lt. Gen. Leslie R. Groves, USA-Ret., head of the WWII Manhattan atom bomb project and now a Vice President of Remington Rand, has been elected President of the Army Distaff Foundation which is engaged in a campaign to raise \$4.5 million over a three-year period. The Foundation plans to build Army Distaff Hall, a 300-unit residence for the widows of Army officers on a 14-acre tract in Washington, D. C.

The Foundation's Board of Directors elected him to succeed General John E. Dahlquist, USA-Ret., who suffered a head injury in a fall in late July and is hospitalized at Walter Reed Army Hospital.

The Foundation's Board of Directors elevated General Dahlquist to the position of Honorary Chairman of the Board. He had served as President since the Foundation was incorporated in February, 1959.

General Groves has been First Vice President of the Foundation.

General Groves, USMA '18, is the son of an Army chaplain who served from the Spanish American War through WWI. General Groves' wife, the former Grace Wilson, was the daughter of an Army Colonel who graduated from West Point in 1877 and served until his retirement for age in 1917. General Groves' son, Maj. Richard H. Groves, USMA '45, is serving with the Corps of Engineers in Paris.

Brig. Gen. Willis A. Perry, USA-Ret., who retired in June after more than 30 years service, has been employed by the Martin Company, Denver, as Site Integration Manager for the Titan installation at Mountain Home AFB, Idaho. He and his wife Wilma will live in Mountain Home.

A daughter, Wilma Helen, is a student at Cornell University, and another daughter, Mrs. Patricia Ann Brandes, is in Hamburg, Germany.

General Perry was Deputy CofS for Plans and Operations at Army Air Defense Headquarters in Colorado Springs at the time of his retirement. Prior to January 1959 he commanded the 47th Air Defense Artillery Brigade, which provides the Nike missile defenses for the greater Los Angeles area.

Brig. Gen. John P. Cooper, Artillery Commander, 29th Infantry Division, Maryland National Guard, has retired. He makes his home at 131 Morris Ave., Lutherville, Md.

Col. Wayne E. Homan, AUS-Ret., 2612 Philmay Terrace, Mt. Penn, Reading, Pa., will be announced in the American Legion Magazine next month as the \$100 first prize winner in their annual American Flag photo contest. Colonel Homan's winning print was titled "Symbols of Freedom: West Point," and is one of a series of "Symbols of Freedom" prints made by him. Colonel Homan, formerly Commanding Officer of the CIC in the Far East and First Army, now is a writer specializing in Japanese art and early American history.

Maj. Charles E. Carlyle, USA, Assistant Chief of the Supply Division, Fourth U. S. Army Medical Section, Fort Sam Houston, Tex., retires 31 August. With his wife Ruth, and children, Eileen, 21; David, 18, and Donald, 16. Major Carlyle will make his home at 3622 Invicta Dr., San Antonio.

Lt. Col. Merton S. Coe, USA-Ret., has been appointed a representative of the Connecticut Mutual Life Insurance Company. He will be associated with the Frank H. Wenner Agency in Utica. Mr. Coe lives with his wife and daughter at Adams Cove, Dexter, N. Y.

Lt. Col. Richard J. Bearr, 38, retires 30 August at Ft. Sam Houston, Tex. With his wife, Lillian, and children, Ann, 17, and David, 15, Colonel Bearr will continue to reside at 118 Springwood Lane, San Antonio.

Lt. Col. Henry W. Gomez, Chief of the Civil Liaison Division, Fourth Army Information Section retires 30 August at Ft. Sam Houston, Tex. A member of the board of directors of the Eloise Jophet School for Handicapped Children, Colonel Gomez will continue to reside at 2907 Chisholm Trail, San Antonio, with his wife, Mary, a retired lieutenant colonel of the Army Nurse Corps.

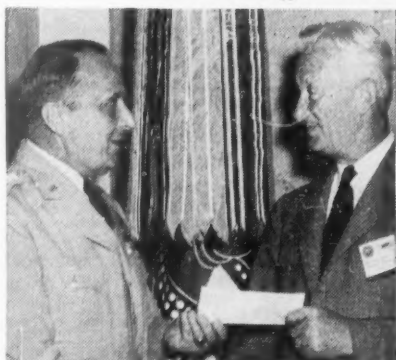

Col. Worth L. Kindred, Arty., USA-Ret., is serving as Executive Vice President of The Equity Annuity Agency, Inc., in Washington, D. C. His last tour of duty was at Fitzsimons Army Hospital, Denver, where he was President of the physical evaluation board. Prior to that, he served on a military staff of the National Security Council in the Pentagon. Colonel Kindred and his family reside in Arlington, Va.

Col. A. A. Heidner, USA-Ret., is now Assistant Headmaster at Carteret School, West Orange, N. J. Prior to his retirement last November, Colonel Heidner was Deputy Post Commander at Carlisle Barracks, Pa. He is living on Ridge Road, West Orange.

Lt. Gen. Edward M. Almond, USA-Ret., of Anniston, Ala., a '15 graduate, has been named a member of the Board of Visitors of Virginia Military Institute by Governor J. Lindsay Almond. General Almond is one of two out-of-state members appointed to the board under legislation passed at the last session of the Virginia General Assembly. The other is Charles W. Lewis, attorney, from New York City.

Maj. Gen. John B. Ackerman, USAF-Ret., and his wife, Pauline, will sail 2 September 1960 aboard the SS America for Southampton, England, for the purpose of establishing their residence abroad.

Chief Contributes To Distaff Drive

GENERAL Lyman L. Lemnitzer, CofS, presents his contribution to the Army Distaff Hall Development Fund to General Campaign Chairman Maj. Gen. L. J. Sverdrup, USA. A campaign to raise \$4.5 million for the Army Distaff Foundation over a three-year period is underway.

IWAKUNI C.O.

Col. Arthur C. Lowell has been named Commanding Officer, Marine Corps Air Facility, Iwakuni, and Marine Wing Service Group 17 in Japan.

He succeeds Lieutenant Colonel Philip L. Crawford, now Deputy to the Commanding Officer.

Prior to arriving in the Far East, Colonel Lowell was Commanding Officer, Marine Aircraft Group 24, at Cherry Point, N. C.

Senate Group Orders Independent Study Of Retired Pay; Stalls On Equalization

From first page—

pay measure which passed the House last May. The Committee said the action was unanimous, but gave no hint as to the fate of the equalization measure which was requested by President Eisenhower. Almost a third of the Senate is on record in favor of the pay bill, and both the Democratic Presidential and Vice Presidential nominees have announced their backing for the measure.

The Vice Presidential nominee, Senator Lyndon Johnson (D-Tex.), a member of the committee, was not present at Saturday's meeting.

No action was taken on the House-passed bill during the Senate Committee meeting, however, and some Capitol Hill sources felt that the clear implication is that the measure is dead for this session. There is, nevertheless, still hope in some quarters that leaders in either party could force action on the measure.

Sources at the Capitol say the measure could be enacted without opposition if the Armed Services Committee would break the pay bill out of the Stennis pigeonhole.

Observers are quick to point out that questions involving future retirement rules are unrelated to the question of restoring the traditional relationship between active duty pay and retired pay for those who were retired prior to passage of the 1958 military pay act. Senator Stennis himself has said that institution of a contributory system for the Armed Services "would not apply to anyone who already has a vested position under the present law."

Representative Paul J. Kilday (D-Tex) asked to comment on the Senate development, told THE JOURNAL a study of mili-

tary retired pay by an independent organization should prove useful, but he said, "I am hopeful that that does not indicate that prompt action will not be taken on HR 11318, as this is an existing situation distinct from general questions about the military retirement system." Congressman Kilday, the top House expert on military pay, won House passage for the equalization measure without a dissenting vote.

The Senate Committee did not indicate how much the new retired pay study will cost, how it will be organized, or who will be called to give testimony.

The announcement of the study was made by the committee in a short press release which left unanswered all questions about the House-passed pay bill. Neither did the release disclose the identity of the Senator who made the motion to authorize the study.

Here is what the announcement said: "During an executive session on Saturday, August 20, the Senate Committee on Armed Services extensively discussed HR 11318, which would increase the retired pay of certain military personnel who were retired before June 1, 1958. The discussion was initiated by Senator Stennis, chairman of the subcommittee to which HR 11318 had been referred."

"At the end of the discussion the committee unanimously authorized the chairman to contract with an independent, non-governmental research organization for the conduct of a full study of the military retirement pay subject, including related questions. The committee hopes that this study can be completed early in 1961 and submitted for further consideration by Senator Stennis' subcommittee at that time."

RAdm. Parker Deputy To Gen. Power In Target Planning; Goes To Offutt AFB

From first page—

ordered to Offutt for duty as Deputy Director.

Admiral Parker is seen certain for early advancement to three-star rank.

In a carefully worded announcement—Text Page 11—Secretary Gates said the new action "provides for centralized planning and decentralized and coordinated execution of plans by the various commanders concerned."

The Air Force had wanted a Joint Strategic Command. The Navy had opposed this, and contended that its strategic weapons, such as the Polaris submarines, must be kept under fleet control to assure maximum effectiveness.

After months of deliberation with the JCS, Secretary Gates concluded that a compromise of the two positions was the best answer.

The Target Center at Offutt will, as Secretary Gates put it, "provide for centrally directed operational planning, under Joint Chiefs of Staff policy control and direction, to insure the integration and employment of the various forces."

It would be difficult to understand how there can be "centrally directed operational planning" without the assurance that weapon systems, such as B-52 bombers, Atlas and Titan missiles, Polaris submarines and attack carriers, are on

specific sites at specific times to perform specific missions in event of an emergency.

General Power long has contended that single operational control of all strategic weapon resources is essential for maximum effectiveness. The new plan in large part answers his plea and that of General Thomas D. White, Air Force CofS, but it does not place the Polaris submarines under direct central command control, which pleases the Navy.

General Power, who continues as SAC CinC, and Admiral Parker, aided by a staff of about 40 officers, will present a list of targets and the weapons which would be used against them to the JCS before the end of the year.

One certain effect of the new plan is the early appearance on the central plotting board at Offutt of Polaris submarines and some Navy attack carriers with pre-ordered strategic missions.

Offutt will not—at least for the present—give orders directly to any Navy ships, but it will state requirements to the JCS, which in turn will assign mission responsibilities. Then, the various fleet commanders will deploy their forces to meet these responsibilities.

This means that Offutt won't say which ship will be at what point at what time, but the Target Center will know, as Secretary Gates put it, "that we can properly integrate the employment of these various forces if it ever becomes necessary to use them."

In a 15-minute reaction environment, the integration process cannot await the sound of alarm.

Col. Stone Commands Dobbins

Col. James J. Stone, jr., is the new commander of Dobbins AFB, Ga., after duty as Deputy CofS for Operations with the 10th Air Force at Selfridge AFB, Mich.

Colonel Stone is married to the former Haroldeen Wilton of Newcastle-on-Tyne, England. They live with a daughter, Kerry Linden, 5, in the commander's quarters at Dobbins.

WILLIAMS—Died Bethesda, Md 16 Aug Lt Col William C Williams, USA-Ret. Burial Arlington National Cemetery, Washington, DC.

Reader's Views

From page 10—

that the majority of the officers approaching the age of 40 and with 20 years service are, in effect, 'no good' (White Charger, etc., etc.). This is fallacy; this is far from a reflection of the true situation and worth of these carefully selected citizens; this is dangerous to the future of the United States; this will lead to an unwillingness on the part of the most desirable young potential officers to pursue a military career.

"Now to 'cap the climax' the Congress has branded me as a very likely prospect to commit a felony or at least a misdemeanor. The law recently passed (by the House) (concerning retired officers' employment in industry) proclaims to the general public that I am not to be trusted and that I am a potential crook. This law in effect says that the mere act of my accepting employment in certain areas of industry is prima facie evidence that I will commit evil, that I will commit a felony or at least a misdemeanor. The law further says to the general public that if I engage in certain pursuits in industry (for which I might, by experience, qualify and in which position I would no doubt be well qualified to be of benefit to the military and consequently to the country) it is assumed I will do this job crookedly; consequently, I am adjudged guilty and fined by the mere acceptance of a particular kind of employment. We have declared that I am not worthy of employment, in contrast to other citizens.

"I consider you an expert on the constitutionality of congressional laws. I ask you: is being determined guilty, without ever even considering such employment, constitutional? Is it constitutional to be judged guilty and to have retired pay deducted therefor? Even more seriously, is it constitutional to be fined by reason of having been judged guilty without so much as a trial?

"I personally am not going to work for industry. I have submitted my papers to the USAF and plan to accept a position with a new Christian College. Nevertheless, the Congress has advised my new associates at that College that I am not to be trusted, that without any temptation whatsoever I should be suspect, perhaps be fined and discharged merely because the opportunity might exist for me to commit a felony. The law, and attendant publicity, implies just that to me and to the general public. This I resent with all the seriousness that I can muster.

"One of the gravest problems that the Congress faces is this: if the Congress, abetted by the Department of Defense, persists in degrading, threatening, and branding the officers of the United States Military Services, then, within the next 25 to 50 years the moral fiber of the Corps, and consequently the dependence of the nation upon these people, will deteriorate to a shocking degree.

"I personally will have none of it. These situations will eventually lead to a lack of devotion, it is an evidence of missing loyalty from the top and I suggest that our law makers give this serious consideration in future years in the Congress . . ."

I appreciate the continued efforts of the ARMY NAVY AIR FORCE JOURNAL on behalf of the dignity of the Corps of Military officers. In the final analysis no finer group of men exists in any walk of life. The Corps surely needs a subjective defense by an influential organization like your Journal. The Congress does not hesitate to crucify the Military and the Department of Defense does not take a stand for the officers; in fact, the Department of Defense frequently abets such crucifixion. No more regrettable situation exists in the world of Democracy.

LT. COL., USAF

JOURNAL CLASSIFIED

For only 14 cents a word (\$1.40) minimum, you can reach a world-wide audience through the classified advertising columns of the "Spokesman of the Services."

Cessna Will Build Republic F-105 Parts

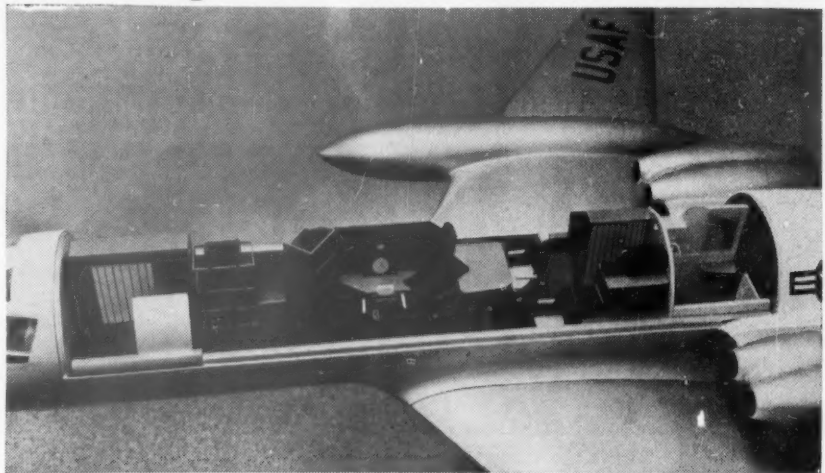

Cessna Aircraft Company's Military Division at Wichita has received a \$3.8 million contract from Republic Aviation Corporation, Farmingdale, N. Y. calling for follow-on production of components for the F-105 Thunder-chief.

The new contract calls for additional production of stabilizer, fin and rudder components. Present production of the tail components will be extended through mid-1962, according to Robert L. Lair, Cessna Vice President and Military Division General Manager.

Cessna officials pointed out that Cessna has been a subcontractor of Republic for nearly five years. In the past, Cessna has produced aircraft components for the Republic F-84F and F-84G aircraft. The latest extension represents the third production contract for F-105 components awarded Cessna.

F-105 components under the newly announced contract will be produced at a cost reduction of 28.9% compared to initial F-105 component costs at Cessna. The production economies are the result of an intensive cost control and reduction program instituted by Republic and supported by its subcontractors. Since the F-105 went into production this program has saved the Government many millions of dollars.

Cabin Arrangement Of MATS' Lockheed C-140 JetStar

CUT-AWAY model shows the cabin interior arrangement of the C-140 (military designation of Lockheed JetStar) which the Airways and Air Communications Service, MATS, will use for evaluating navigational facilities at world-wide military bases. Centered in the cabin, which is 28 feet long, is the primary operator's console. To his right are two auxiliary crew stations. AACS electronic equipment racks are near the front and rear of the pressurized cabin. There also is a lavatory and baggage compartment. The C-140, powered by four Pratt and Whitney JT-12 jet engines, flies to altitudes of 45,000 feet and to speeds of 550 miles per hour. It duplicates flight patterns of modern, high-speed military aircraft, thereby enabling the military to check the accuracy of navigational, radio, and traffic aids.

Aeronutronics Awards

Lunar Capsule Contract

Award of two subcontracts by the Aeronutronic Division of Ford Motor Company on its lunar capsule development program is announced at Newport Beach, Calif.

Gerald J. Lynch, Aeronutronic General Manager and Vice President of Ford's Defense Products Group, reported subcontracts to Hercules Powder Company, Wilmington, Del., for the lunar capsule retro-rocket, and Ryan Electronics, a Division of Ryan Aeronautical Company, San Diego, for an altimeter.

Under contract to the Jet Propulsion Laboratory, Pasadena, Calif., Aeronutronic is building a 300-pound instrumented package which will be impacted on the moon within the next two years. It will be launched from a larger spacecraft now being built at JPL as part of the Ranger program.

The Aeronutronic subcontract calls for Hercules Powder Company to build flight configurations of a retro-rocket motor.

Engineering, development, and production of the retro-rocket will be carried out by Hercules at its Bacchus, Utah, facility.

The altimeter to be provided by Ryan

under the Aeronutronic subcontract will give the lunar capsule the "go" signal to separate from the Ranger space craft as it approaches the moon.

The altimeter, its antenna, and support structure will be mounted on the Ranger spacecraft and remain with it.

The Jet Propulsion Laboratory provides technical direction to Aeronutronic on its lunar capsule development program.

ARDC Lets \$20 Million Contract For BLC Test

A \$20 million contract for flight testing "a real break through" in boundary layer control has been awarded by the Air Research and Development Command to the Northrop Corporation.

Lt. Gen. B. A. Schriever, ARDC Commander, sees the development as a big step in the Air Force's ten year search for a method of extending the range and endurance of aircraft.

By using a suction principle to maintain smooth air flow over the wings and tail surfaces, Low Drag Boundary Layer Control is said to reduce the drag of air friction by as much as 80 per cent. This would enable large aircraft to carry a given payload much farther with the same fuel and less cost.

INDUSTRY IN DEFENSE

Sperry Dedicates New Utah Facility;
"Torture Chamber" For Sergeant Missile

SALT LAKE CITY, UTAH

DEMONSTRATION of a "torture chamber" to test the Army's Sergeant guided missiles, marked dedication ceremonies here 24 August of a new \$1.2 million addition to the facilities of Sperry Utah Engineering Laboratories.

Maj. Gen. John A. Barclay, Deputy Commander of the Army Ordnance Missile Command, participated in the dedication as did Governor George D. Clyde of Utah, and Dr. Carl Frische, president of Sperry Gyroscope Company. Sperry is prime production contractor for the 85-mile range Sergeant surface-to-surface guided missile.

Full-scale industrial production is slated to begin soon in the newly expanded facilities.

A feature of the program was a demonstration of the loading of the Sergeant on its launcher in a mere matter of minutes by a special team from White Sands Missile Range, N. Mex.

Following the ceremonies the "torture chambers," advanced environmental laboratories to administer severe and widely varying tests to the missile, were shown the visitors.

The value of the test program was emphasized by the recent release by the Army of the 100% successful test firing record of the Sergeant. According to the Army report, in about two score test firings of the Sergeant to date, every missile fired successfully.

Bell Will Join
Skybolt Team

Bell Aerosystems Company of Buffalo, N. Y., will participate in the Air Force GAM-87A Skybolt, air-to-ground ballistic missile, under contract to the Northrop Corporation, Beverly Hills, Calif.

The amount of the contract was not disclosed.

Bell's Avionics Division will provide miniature accelerometers for the missile's guidance system, for which Northrop is subcontractor to Douglas Aircraft, overall missile contractor.

Bell is also supplying accelerometers for guidance systems of the Army's Sergeant tactical surface-to-surface missile and the Air Force's Midas and Samos early-warning and surveillance satellites.

Within the guidance system, accelerometers measure a missile's acceleration and relay the information to a computer which determines the course correction required.

Bell will manufacture the accelerometers in its Cleveland instrument laboratory.

Bell pioneered in the development of guidance for air-to-ground guided missiles with the Air Force Rascal, for which the company was prime contractor.

Col. Davis Gets Detroit Arsenal

Col. John H. Davis has been designated Commanding Officer of the Detroit Arsenal, Center Line, Mich.

Colonel Davis and his wife, Ella, have two children, Diana and John.

First demonstration was of the vibration or "shake" test on the giant C-200A shaker, largest manufactured in America. The gigantic shaker is mounted on an isolating 222,000 lb. "floating" concrete pad.

For these tests a cone-shaped, polished-reflector heating fixture constructed of thin-gauge aluminum is used. Internal rings suspended by standoff insulators form the power connections or buss bars for scores of quartz infrared heating lamps. These lamps dissipate more than 200 kilowatts of power at rated voltage.

After the missile nose shell was placed in the heating fixture, vacuum pumps expelled nose-shell air, thus simulating pressure conditions found at extremely high altitudes.

Connected to the test fixture was a high-speed data acquisition system, which for this short duration test was used to record in punch-tape form, scores of different skin temperatures. A pressure transducer was added to record the pressure at the moment of buckling.

Additional tests were shown duplicating other environmental extremes which the U. S. Army Sergeant may encounter on some battlefield of the future. Among these were shipping and handling, and sand, dust, fungus, and salt spray tests.

Still other tests demonstrated the capability of 15 weather, temperature, and altitude chambers.

Vought Sonobuoy
Gets Key West Test

A small group of Chance Vought engineers from Dallas are testing a new type of sonobuoy designed for detecting the movements of enemy submarines.

Working under a development and testing contract of \$350,000, engineers from the Electronics and Aeronautics Divisions are making full use of small craft, barges and submarines at the Key West, Fla., Naval Base to seek an answer to one of the biggest "headaches" the Navy faces today.

The buoy, a floating electronic device, is expected to provide a solution to some hitherto perplexing anti-submarine warfare problems.

The idea for the sonobuoy was conceived by a group of University of Texas scientists who formed Texas Research Associates in Austin. Research was done by the Aeronautics Division, cooperating with the group under subcontract. The project is being managed by the company's anti-submarine warfare department.

Auto Supply Agency
For All Services

The Military Automotive Supply Agency has been established at the Army Ordnance Tank-Automotive command in Detroit.

Establishment of the Agency at the Ordnance Tank-Automotive Command will provide integrated supply management and procurement of military automotive supplies for all the Services.

North American Aviation Builds Mach-20
Wind Tunnel To Meet Space Problems

A new "hot shot" wind tunnel triggering air currents up to 20 times the speed of sound will help scientists at North American Aviation's Missile Division, Downey, Calif., find ways to get man back safely from outer space.

Officially called the Electrodynamics Facility, the "hot shot" is in the Missile Division's Aero-Space Laboratories. It will be used to learn the pressures, heat transfer and aerodynamics forces to be overcome by space vehicles.

One example of research with the new tunnel will be to find ways to control a space ship returning from outer space.

Space ships will re-enter at speeds many times faster than sound through extremely thin air which still will generate tremendous heat, said Dr. E. R. van

Driest, Director of the Laboratories. Conventional control surfaces may not steer a space ship. The "hot shot" may help scientists perfect controls that will.

To create hypervelocity air speeds, the tunnel uses a cylinder of air under 2,000 pounds per square inch pressure—corked by a thin plastic membrane—attached to a bottle-shaped test chamber under vacuum. Energy from an electric charge instantaneously boosts the cylinder air pressure to about 30,000 pounds per square inch. The pressure jump bursts the membrane and the air rushes into the vacuum test area at speeds from 10 to 20 times faster than sound.

The entire test is over in hundredths of a second—far faster than the eye can follow, but not too fast for special instruments to record the results.

HONEYWELL CREATES ADVANCED SYSTEMS UNIT

MINNEAPOLIS-HONEYWELL Regulator Company has created a new corporate division whose primary objective will be "the advancement of the state of the art" of complex integrated control systems for industrial and military applications. Paul B. Wishart, Honeywell President, said the new Special Systems Division will be headquartered at Pottstown, Pa., under John W. Morrison as General Manager, in a facility that formerly was the company's Missile Equipment Division.

Mr. Wishart said that in addition to the systems capability being centered in Pottstown, the new division will utilize over-all corporate capability on a subcontract basis. Included in over-all control systems capability are divisions of the company's Industrial Products Group, Temperature Controls Group, Military Products Group and the Datamat Division, which produces electronic data processing equipment.

Because the Special Division is intended to take maximum advantage of over-all corporate capability, it will report directly to the President rather than being assigned to an existing product group, Mr. Wishart said.

Lockheed Gets
Satellite Awards

Lockheed Missile and Space Division has received a \$76.7 million contract from the Ballistic Missiles Center to continue development of a ground-space communications and control network for the Air Force's Discoverer, Midas and Samos satellite programs, it is announced by Maj. Gen. Thomas P. Gerity, BMC Commander, and Herschel J. Brown, Lockheed Vice President and General Manager of Missile and Space Division.

The award broadens the Missiles and Space Division's activities to include systems engineering and technical direction for the communications and control network. The company also is the systems manager and prime contractor to the Air Force Ballistic Missile Division for the design and manufacture of the Agena satellites for the Discoverer, Midas (Missile Defense Alarm System), and Samos reconnaissance satellite programs.

The new contract names the Lockheed Missiles and Space Division to assist the Air Force in establishing an integrated associate contractor team for satellite tracking and data readout facilities. General Gerity said. Lockheed will build hardware, man some of the communications and control stations, build and install hardware in the Air Force's Satellite Test Center in Sunnyvale, and assist the Air Force in the operation of the center.

The Philco Western Development Laboratories, Palo Alto, Calif., has assumed an associate prime contractor role for ground-space communications under Lockheed's technical direction. Philco will provide tracking antennas and other equipment, install equipment, and man a portion of the ground stations.

A subcontractor team already has been selected by Lockheed and the Air Force to supply components for the systems to be used in the network.

Hiller Figures In Merger

Stanley Hiller, jr., president of Hiller Aircraft Corporation, and R. H. Davies, President of Electric Autolite Company, have announced a contract to merge the businesses of the two companies. Final approval of this action will be solicited from the stockholders of both companies within the next few months.

R. H. Coffin Heads RCA's
Ad & Sales Promotion

Mr. R. H. Coffin, who served with the War Production Board during World War II, has been appointed Staff Vice President, Advertising and Sales Promotion, of the Radio Corporation of America. Mr. Coffin will head RCA's newly consolidated institutional and staff advertising and sales promotion activities.

Mr. Coffin will be responsible for coordinating policy on both product and institutional advertising. He will report to Kenneth W. Bilby, Vice President, Public Affairs. Mr. Coffin joined RCA in 1949.

Beech Wins Navy
Refueling Award

Beech Aircraft Corporation, Wichita, has received a Bureau of Naval Weapons \$1 million contract for development of high performance in-flight refueling systems.

James N. Lew, Beech Vice President-Engineering, said the contract follows an original design study which Beech won in an industry competition in 1957. Beech will design and fabricate a flight test experimental unit and three prototypes, which will then be subjected to jettison, operational and endurance testing.

Navy specifications call for developing a probe and drogue refueling system which may be adapted universally to half a dozen or more Navy attack and fighter aircraft. The external system will convert a fighter into a small tanker for refueling another fighter "buddy style" and increasing its range from a carrier deck.

Beech won the design contract through proposing a unique flexible hose and drogue system which is completely mechanical. Ram-air driven, the Beech system eliminates hydraulic controls ordinarily employed in refueling systems.

The 14-foot long tanks are designed to pump fuel from one aircraft to another at a rate of about 400 gallons per minute and to be flown at speeds up to 460 mph and altitudes above 50,000 feet. A flexible hose trails 40 feet behind the tanker plane to be coupled with the receiving plane's probe.

Senate Committee Sees Necessity for "Some" Negotiated Contracts; Asks 6 Changes

From first page—

and administered. All of the major contract types now used can produce undesirable cost, price, or profit consequences if used inappropriately or if they are not carefully negotiated and administered.

● Indispensable prerequisites for formal advertising frequently do not exist in modern military procurement and, hence, some contracts must be negotiated.

● Negotiation does not necessarily mean the absence of competition. The extent of the competition that may be obtained under each of the 17 exceptions of the Armed Services Procurement Act of 1947 varies in accordance with the nature of the exception.

● Procurement law does not retard the availability of advanced weapons systems. However, programing decisions and administration of the laws frequently result in unnecessary delay.

● The volume of contemporary military procurement is such that authority to procure cannot be unduly centralized and some authority must be delegated.

● Complexities of contemporary military procurement are such that procurement law cannot be so inflexible as to preclude exercise of judgment by procurement officials. In this area, as in so many areas of government, it is virtually impossible to legislate a requirement that good judgment be used.

In commenting on the prerequisites which are indispensable to formal advertising the Committee said "Congressional and public criticism of military procurement has concentrated heavily on the high proportion of procurement actions and dollars awarded by negotiation instead of by formal advertising. Before this method of procurement can be effectively used, there are four basic prerequisites. These are:

"1. An adequate specification or purchase description must be available.

"2. There must be two or more suppliers willing and able to compete for the business.

"3. The selection of the successful bidder ordinarily can be made on the basis of price alone.

"4. There must be sufficient time to perform the administrative procedures required under formal advertising, such as sending out invitations for bids, allowing time for the submission of bids, opening the bids, determining which bidders are responsible and which bids are responsive to the invitation, and awarding the contract."

The Committee said the availability of specifications is one of the chief limitations on more extensive use of formal bidding and the Services should "do everything possible to develop adequate specifications and to use those that have been developed." The Committee said it has received assurances that concentrated effort is being devoted to this objective.

Advantages of Formal Advertising

"Formal advertising has certain obvious advantages," the Committee said. "Since public moneys finance military procurement, the qualified companies that through taxes furnish these public funds should have an equal opportunity to compete for public business. Moreover, keen competition is likely to result in lower prices and to allay concern over favoritism. Another advantage of formal advertising is that specifications permit awards ordinarily to be based on price alone and, thus, reduce the use of subjective judgments that can be involved in awards by negotiation."

On the other hand, the Committee said formal advertising "is not an end in itself. The desired objective is that the maximum number of qualified suppliers have notice of a proposed procurement and a fair opportunity to compete for it."

In this connection, the Committee noted that, with certain exceptions, every proposed advertised or negotiated procurement made in the U. S. (except Alaska and Hawaii) that may result in an award in excess of \$10,000 is required to be published in the Department of Commerce publication, "Synopsis of U. S. Government Proposed Procurements, Sales, and Contract Awards."

The regulation requiring publication of

these procurements has been modified recently to broaden the procurements which are subject to publication. The new additions include: (1) procurements where the contracting officer knows of only one source, (2) research and development programs, and (3) classified purchases where publication will not prejudice the security classification.

The Committee said if procurement actions "are, in fact, being accomplished by negotiating with only one source when other possible suppliers are available, the expanded form of this reporting requirement should furnish an opportunity for such suppliers to make their availability known."

Advanced Weapon Systems

In connection with the Committee's comment that the procurement law does not retard the availability of advanced weapon systems, Senator Leverett Saltonstall (R-Mass.) filed "additional views." Senator Saltonstall is the author of an expanded weapon concept plan.

In his separate statement, he said he was motivated in introducing the weapon concept legislation "by testimony before the Preparedness Investigating Subcommittee in late 1957 and early 1958. In substance, this testimony was to the effect that progress in the development and production of advanced weapons was hampered by review after review at successive and coordinate levels of authority and by involvement of a proliferation of committees. Thus, 'lead time'—the period from the conception of the military requirement to the delivery of operational hardware—was unduly increased."

Senator Saltonstall said "Much of the review and coordination to which procurement is subjected has resulted from criticism that is often not carefully considered. Such criticism tends to repress initiative and resourcefulness."

He added that he "heartily" favors the Committee's recommendations "that changes in regulations rather than changes in existing laws are desirable," but said if it develops that procurement cannot be speeded up and "lead time" reduced, then legislation "along the lines" of his weapons concept plan may still be desirable. "It is with this background," he said, "that I go along with the committee report."

Recommended Changes

Here are the Committee's recommendations:

I. The procurement regulations should be amended to state affirmatively a preference for formal advertising whenever this method is practicable.

The legislative history of existing procurement law manifests a congressional intent that the military departments use formal advertising in all procurements in which this method could reasonably be expected to give satisfactory results, even though circumstances might exist that would be sufficient to authorize negotiation under 1 or more of the 17 exceptions. Despite this obvious intent, neither the law nor the regulation affirmatively expresses a preference for formal advertising. The committee recommends that the regulations provide for the use of formal advertising in all cases in which this method is practicable, notwithstanding the existence of an exception under which the procurement could be negotiated.

II. The regulation governing the use of exception 14 should be revised to make clear that use of this exception should not be founded on avoidance of duplication of private investment unless this duplication could be shown to result in additional cost to the government.

Exception 14 cannot be used unless the Secretary determines that its use is for technical or special property that requires a substantial initial investment or an extended period for manufacture and that procurement by formal advertising may require duplication of investment or preparation already made or would unduly delay the procurement of that property.

The bare words of this exception could leave the impression that contracts may be negotiated under it to avoid duplication of private rather than government investment. The committee believes that avoidance of private investment alone is insufficient to justify use of this exception unless it can be shown that formal advertising is likely

to result in additional cost to the Government.

III. The regulation covering the conduct of negotiations should be changed to expand the requirement for discussions with offerors under negotiated procurements.

In a negotiated procurement, the procurement regulation now provides that where one offeror submits a proposal that is clearly and substantially more advantageous to the Government, negotiations may be conducted with that offeror only.

The committee recommends that the regulations in this area be modified to require, with certain exceptions, that oral or written discussions be had with all responsible offerors who submit proposals within a competitive range. Excepted from this requirement would be procurements involving not more than \$2,500, those in which prices or rates are fixed by law or regulations, those in which time of delivery will not permit such discussions, those involving authorized set-aside programs, and those in which it can be clearly shown that adequate competition or prior-cost experience is likely to produce reasonable prices without such discussions. In the latter exception, the request for proposals should notify all offerors of the possibility that the award may be made without discussion. If discussions are unnecessary in the ordinary case, it is difficult to understand that the procurement could not have been accomplished by formal advertising. At the same time, the committee recognizes that an inflexible requirement for discussions with all offerors could encourage the offerors to pad their initial proposals and not to quote their best prices first.

IV. The Regulation on incentive contracts should be amended to require a contractual provision permitting adjustment of the target cost to exclude any amounts by which the target cost was increased because of inaccurate, incomplete, or out-of-date cost data submitted by the contractor.

"Fixed-price incentive contracts," involve the negotiation of a target cost and a profit formula under which the contractor benefits if he performs the contract for less than the target cost. If the target cost is unrealistic, the contractor may receive profits under the sharing formula that are not a result of his efficiency but of an inflated target cost. After the General Accounting Office submitted several reports to the Congress on cases in which contractors received unwarranted profits because the cost data used in establishing target cost were inaccurate, incomplete, or out of date, the Department of Defense amended the regulations to require certificates of cost. Willful execution of a false certificate makes the contractor subject to criminal penalties, including imprisonment.

The committee believes that, in addition to this safeguard, the contract itself should contain a provision permitting adjustment to exclude profit consequences based on inaccurate, incomplete, or out-of-date information furnished by the contractor.

V. The procurement regulations should be amended to require more specific determinations and findings.

The law now requires certain determinations and findings before negotiation Exceptions 11 through 16 may be used, before cost, cost-plus-fixed-fee, or incentive contracts may be used, and before advance payments may be made.

The General Accounting Office informed the committee that its review of these findings and determinations has disclosed that they tend to be brief and stereotyped, and that they do not provide enough information to show the factors upon which the decisions were based. The committee recommends that these determinations be made more explicit and that they set out enough facts and circumstances to justify clearly the determination or finding.

VI. The regulations should be expanded to include a requirement for written findings before certain of the exceptions may be used to negotiate contracts.

Exceptions 11 through 16 may not be used until after the Secretary makes the determinations and findings required in those exceptions. The other authorities for negotiating contracts do not depend on any finding.

The committee recommends that the Department make appropriate changes in the regulations to provide that Exceptions 2, 7, 8, 10, and 12 may not be used for negotiating contracts unless there has been a written finding clearly indicating that the use of formal advertising would be impracticable. This requirement should also apply before Exception 11 may be used for negotiating contracts for property or supplies used in connection with research and development.

Some of the 17 exceptions are intended

for use in circumstances where it is self-evident that formal advertising is impracticable. In other cases, the existence of an authority to negotiate does not necessarily mean that it is impracticable to procure by formal advertising. This recommendation is intended to apply to those exceptions in which existence of an authority to negotiate is not, in itself, adequate justification for not procuring by formal advertising. This expanded requirement for findings would apply in the following circumstances:

Exception 2 (where the public exigency will not permit the delay incident to advertising);

Exception 7 (where the purchase or contract is for medicine or medical supplies);

Exception 8 (where the purchase or contract is for property for authorized resale);

Exception 10 (where the purchase or contract is for property or services for which it is impracticable to obtain competition);

Exception 11 (where the purchase or contract is for property or services in connection with experimental, developmental, or research work);

Exception 12 (where the purchase or contract is for property or services of a classified nature).

The expanded requirement would apply only to the part of Exception 11 relating to the acquisition of property or supplies.

VII. The departments should continue their efforts to develop adequate specifications and to use those that have been developed in an attempt to make practical more procurement by formal advertising.

VIII. The departments and prime contractors should continue efforts to publicize the prospective awarding of subcontracts in an attempt to secure more competition.

Prime contracts that may result in awards in excess of \$10,000 are, with certain exceptions, published by the Department of Commerce in the "Synopsis of U. S. Government Proposed Procurements, Sales, and Contract Awards." Similar publication of proposed subcontracts may be impractical because of the number of such contracts. The committee expresses the hope, however, that the departments and the contractors may evolve a system that will permit broader notice of proposed subcontracts without imposing an unacceptable delay or burden of paperwork.

IX. The departments should continue the emphasis that is being placed on the training of procurement personnel.

Seek Pentagon Report

The Committee said it has forwarded its recommendations to the Department of Defense with a request that the Committee be furnished a report in January of 1961 on the extent to which the recommendations have been implemented.

Pending receipt of the report, the Committee said it is making no legislative recommendations "at this time."

Ken Ellington Aids Public Schools Effort

Ken Ellington, vice president and assistant to the president of Republic Aviation Corporation, has been appointed Aviation Industry Chairman in the 1960 volunteer fund raising campaign of the New York State Citizens Committee for the Public Schools, Inc.

Formed eight years ago, the Committee, with headquarters at 2 West 45th Street in New York City, is a non-profit organization. Through field services and an information exchange program the Committee helps almost 2,000 local citizen school groups in the state work to strengthen their school program. It also aids citizen councils of other states.

Mr. Ellington serves as a member of the Materials of Instruction Committee of the National Aviation Education Council, as a trustee of Adelphi College in Garden City, Long Island, and a member of its Business Advisory Council, and as chairman of the Board of Directors of JETS, Inc. (Junior Engineering Technical Society).

Mr. Ellington lives in Lake Success, New York, with his wife and son.

Service Chiefs Send Greetings To The Army Navy Air Force Journal On Its 97th Birthday

The Honorable Thomas S. Gates, Jr., Secretary of Defense—"For Ninety-seven years the Army Navy Air Force Journal has devoted itself to the men and women of our Armed Forces who have been protecting our American Heritage.

"Throughout this long span of years The Journal has been a constant source of strength and encouragement for military personnel.

"On behalf of the Department of Defense, I take pleasure in extending birthday greetings with best wishes for continued success in serving our people."

General Nathan F. Twining, Chairman, Joint Chiefs of Staff—"I extend my sincere congratulations to the Army, Navy and Air Force Journal on the occasion of the 97th anniversary of its distinguished service to the members of the Armed Services and to their families. This splendid publication has always been vigilant in protecting and furthering the interests of the United States and particularly of our Armed Services. It has earned by its accuracy, impartiality and excellence the increasing support which it gets."

The Honorable Wilber M. Brucker, Secretary of the Army—"The men and women of the United States Army join with me in extending heartiest congratulations to the Army Navy Air Force Journal on its ninety-seventh anniversary.

"The Journal can be justly proud of its importance to the members of our defense establishment as a dependable source of news and information. The high journalistic standards and impartial and objective editorial policy have, through almost a century, gained respect and admiration for this important service publication.

"We send you best wishes for the years ahead."

The Honorable Dudley C. Sharp, Secretary of the Air Force—"On this 97th anniversary of the establishment of the Army Navy Air Force Journal, I extend my congratulations to you and all the others responsible for this well informed publication. Born two months after the Battle of Gettysburg, the Journal has since that time consistently directed its influence to strengthening the national military establishment.

"On behalf of the Department of the Air Force, I wish you many more successful years."

General L. L. Lemnitzer, Chief of Staff, United States Army—"It is my pleasure on behalf of the United States Army to extend greetings and congratulations to the Army Navy Air Force Journal on the occasion of its ninety-seventh anniversary.

"For nearly a century, the Journal has been an outstanding informational medium for the members and families of the United States Armed Forces. It has been a highly respected publication, not only providing a valued interpretation of professional matters, but also apprising its readers of the social activities of their friends. Throughout the years, its community and public service activities, its accurate reporting and objective editorials, combined with its emphasis upon the members of the Armed Forces as individuals, have comprised an important contribution to the breadth of information, effectiveness, and morale of the members of the military establishment.

"We of the Army are pleased to extend best wishes to the Army Navy Air Force Journal for continued success."

Admiral Arleigh Burke, Chief of Naval Operations—"It hardly seems possible that an entire year has gone by since your last anniversary. I'm sure that you find the passage of time equally surprising.

"The Army Navy Air Force Journal, in observing its Ninety-Seventh Anniversary, can

look back on almost a century of service to military readers. During that time your publication has become a permanent fixture in most service homes. It is highly respected for its accuracy and wide coverage of the events which are of primary interest to the serviceman and his family.

"Publications, like people, can be old although relatively young in years. Similarly, there are many people who continue to be youthful regardless of their age. They are interested in things, and through this interest they retain an exuberance which belies their actual age.

"I think one of the reasons the Army Navy Air Force Journal continues to be so respected is because it retains an interest in things that happen every day. This has been a main factor in its many years of service and will continue to be a factor in the years to come.

"My very best regards to your wonderful publication on its Ninety-Seventh Anniversary."

General Thomas D. White, Chief of Staff, United States Air Force—"Both personally, and on behalf of the United States Air Force, I extend hearty congratulations to the Army Navy Air Force Journal on the occasion of its 97th anniversary.

"The Journal, by reason of objective and comprehensive reporting, has attained a status in its field difficult to equal.

"Airmen everywhere join me in sending best wishes for your continued success."

General David M. Shoup, Commandant United States Marine Corps—"I take great pleasure in extending heartiest congratulations and best wishes from the United States Marine Corps to you, and to all the members of your staff on the occasion of the ninety-seventh anniversary of the establishment of the Army Navy Air Force Journal.

"It is in keeping with the record of The Journal over the years that since its establishment on 29 August 1863 it has not missed an issue. The Journal is known by Service people for the reliability and completeness of its coverage of newsworthy matters affecting the Armed Forces.

"With warmest personal regards and every good wish for the continued success of the Army Navy Air Force Journal."

Admiral A. C. Richmond, The Commandant of the United States Coast Guard—"On behalf of the United States Coast Guard, it gives me great pleasure to extend heartiest congratulations to you and your staff on the occasion of the 97th anniversary of the Army Navy Air Force Journal.

"By your accurate and competent coverage of all major developments in our military establishment you have won a deservedly wide readership throughout the Armed Services. I am sure that you will continue to serve your many readers with the same distinction which has characterized your past.

"It is my sincere wish that you have many more years of successful publication."

Lieutenant General Robert J. Wood, Commanding General, U. S. Army Air Defense Command—"On behalf of the members of the United States Army Air Defense Command, I wish to congratulate the Army Navy Air Force Journal on its ninety-seventh anniversary.

"As 'Spokesman of the Services,' the Journal can well be proud of its many years of devoted attention to the needs of military personnel and their families. We particularly value your accurate and thorough coverage of the United States Army Air Defense Command.

"Please extend my best wishes for future success to all members of the Journal staff on this memorable occasion."

A Memorable Month—

AUGUST 1960 will be recorded as one of the most spectacular months in U. S. military history.

It was marked by fantastic achievements in space, and by a vital decision affecting strategic target planning in all the Services.

August saw announcement that General Nathan F. Twining, JCS Chairman, would retire and be succeeded by General Lyman L. Lemnitzer, with General George H. Decker, moving up from Vice CofS to the top Army post.

The Navy continued its brilliant progress with the Polaris program, and announced plans for a class of FRBM submarines, the first to be named the Lafayette.

The annual meeting of the Association of the U. S. Army saw details disclosed regarding plans for revamping of divisions under a MOMAR concept, for Modern Mobile Army.

Biggest 24 Hours

Between noon on Thursday 11 August and noon Friday 12 August, the Air Force scored its biggest 24 hours in missile-space history.

Here is the run-down on that epic day: The 24-hour period began at 12:24 P.M. Thursday, 11 August, when the first of three successful Bomarc missile launchings took place on Santa Rosa Island in the Gulf of Mexico near Eglin AFB, Fla. Each of the Bomarc, guided from a SAGE computer at Montgomery, Ala., successfully intercepted a target drone at a distance of more than 170 miles and altitude of about 35,000 feet.

At 10:05 P.M. that evening a GAM-77 Hound Dog missile was launched from a B-52 bomber near Eglin and new more

than 450 miles to achieve its major test objectives.

This was followed scarcely 20 minutes later by the successful recovery from outer space—the first in history—of the Discoverer XIII satellite capsule from the Pacific waters near Hawaii.

ARDC's Echo

The following morning at about 6 A.M., the Air Research and Development Command completed the world's first intercontinental radio transmission from an Echo I passive communications satellite.

Three hours later at 9 A.M. an operational Atlas flew 5,000 miles down the Atlantic Missile Range, to mark the second such successful test in a week.

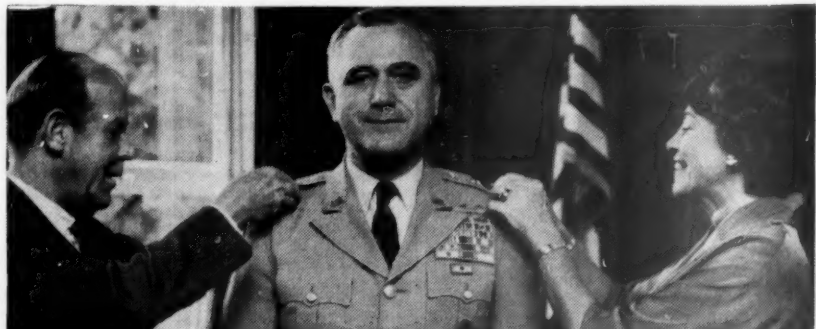

The history-making day was completed at noon 12 August when the North American X-15 rocket plane carried its pilot, Maj. Robert M. White, to a record altitude of 136,000 feet—nearly 26 miles up and higher than man has ever flown.

While the epic day in space was occupying world attention, Air Force personnel on the ground were putting the final touches to their minuteman missile mobility test train, which finally departed Hill AFB, Utah, several weeks ahead of schedule on 16 August. Departure of the train marked a major stride in putting the solid-fuel ICBM on the rails.

Balloon Records

Also on 16 August, Air Force Capt. Joseph W. Kittinger, Jr., jumped from a balloon approximately 102,800 feet over the New Mexico desert to set three world's records: highest manned balloon flight of 102,800 feet, compared to the previous

Second Star For MAAG Chief In Germany

WALTER Dowling, U. S. Ambassador to the Federal Republic of Germany, and Mrs. Richard Steinbach, participate in ceremonies at which General Steinbach received his second star. He is the new Chief of the MAAG Germany at Bonn.

record of 101,516 feet set by Lt. Col. David Simons in 1957; Longest free fall of 85,300 feet, breaking his own record of 66,400 feet set in 1959; and a record jump of 102,800 feet, again breaking his previous record of 76,400 feet.

A major stride in unified military planning was taken by Secretary of Defense Gates on 17 August with the establishment of a Joint Strategic Target Planning Staff, under SAC Commander General Thomas S. Power, at Offutt AFB, Neb.

The North American X-15 rocket plane entered the news again on 19 August when test pilot Joseph A. Walker flew the craft to a record speed of 2,196 miles an hour. That same day ground transportation was also given a boost by Army Secretary Wilber M. Brucker's establishment of the Military Automotive Supply Agency in Detroit to manage automotive supplies for all Services.

Three days later, on 22 August another space first was recorded as a C-119 aircraft piloted by Capt. Harold E. Mitchell snatched a Discoverer XIV re-entry capsule from mid-air approximately 360 miles southwest of Honolulu.

While U. S. space and missile achievements, including the successful "kill" of a Nike Hercules missile by another Nike Hercules above the White Sands Missile Range 12 August, were grabbing headlines, future space progress was being assured 15 August by the strengthening of the Army R&D program under Lt. Gen. Arthur G. Trudeau and the successful firing of the operational prototype of the Air Force's Titan ICBM along the Atlantic Missile Range 11 August.

This listing of epic events for the month of August admittedly may be incomplete, for as THE JOURNAL went to Press 24 August the month still had seven days to go.
